

Anti-IPO9 / Importin 9 Antibody (aa840-1041)
Rabbit Anti Human Polyclonal Antibody
Catalog # ALS18399**Specification****Anti-IPO9 / Importin 9 Antibody (aa840-1041) - Product Information**

Application	WB, IHC-P
Primary Accession	Q96P70
Predicted	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	115963

Anti-IPO9 / Importin 9 Antibody (aa840-1041) - Additional Information**Gene ID** 55705**Alias Symbol** IPO9**Other Names**

IPO9, Importin-9, Importin 9, KIAA1192, Ran-binding protein 9, Imp9

Target/Specificity

Human IPO9 / Importin 9

Reconstitution & Storage

Purified

Precautions

Anti-IPO9 / Importin 9 Antibody (aa840-1041) is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-IPO9 / Importin 9 Antibody (aa840-1041) - Protein Information**Name** IPO9 {ECO:0000303|PubMed:30855230, ECO:0000312|HGNC:HGNC:19425}**Function**

Nuclear transport receptor that mediates nuclear import of proteins, such as histones, proteasome and actin (PubMed:11823430, PubMed:34711951, PubMed:30855230). Serves as receptor for nuclear localization signals (NLS) in cargo substrates (PubMed:11823430). Is thought to mediate docking of the importin/substrate complex to the nuclear pore complex (NPC) through binding to nucleoporin and the complex is subsequently translocated through the pore by an energy requiring, Ran-dependent mechanism (PubMed:11823430). At the nucleoplasmic side of the NPC, Ran binds to the importin, the importin/substrate complex dissociates and importin is re-exported from the nucleus to the cytoplasm where GTP hydrolysis

releases Ran (PubMed:11823430). The directionality of nuclear import is thought to be conferred by an asymmetric distribution of the GTP- and GDP-bound forms of Ran between the cytoplasm and nucleus (PubMed:11823430). Mediates the import of pre-assembled proteasomes into the nucleus; AKIRIN2 acts as a molecular bridge between IPO9 and the proteasome complex (PubMed:11823430, PubMed:34711951). Mediates the nuclear import of histones H2A, H2B, H4 and H4 (PubMed:11823430, PubMed:30855230). In addition to nuclear import, also acts as a chaperone for histones by preventing inappropriate non-nucleosomal interactions (PubMed:30855230). Mediates the nuclear import of actin (By similarity).
