

Anti-SYVN1 / HRD1 Antibody
Rabbit Anti Human Polyclonal Antibody
Catalog # ALS18596

Specification

Anti-SYVN1 / HRD1 Antibody - Product Information

Application	WB, IHC-P
Primary Accession	Q86TM6
Predicted	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	67685

Anti-SYVN1 / HRD1 Antibody - Additional Information

Gene ID 84447

Alias Symbol **SYVN1**
Other Names
SYVN1, KIAA1810, Synoviolin, Synovial apoptosis inhibitor 1, DER3, HRD1

Target/Specificity
Human SYVN1 / HRD1

Reconstitution & Storage
Affinity purified

Precautions
Anti-SYVN1 / HRD1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-SYVN1 / HRD1 Antibody - Protein Information

Name SYVN1

Synonyms HRD1, KIAA1810

Function
E3 ubiquitin-protein ligase which accepts ubiquitin specifically from endoplasmic reticulum-associated UBC7 E2 ligase and transfers it to substrates, promoting their degradation (PubMed: [12459480](http://www.uniprot.org/citations/12459480), PubMed: [12646171](http://www.uniprot.org/citations/12646171), PubMed: [12975321](http://www.uniprot.org/citations/12975321), PubMed: [14593114](http://www.uniprot.org/citations/14593114), PubMed: [16289116](http://www.uniprot.org/citations/16289116), PubMed: [16847254](http://www.uniprot.org/citations/16847254), PubMed: [17059562](http://www.uniprot.org/citations/17059562)),

PubMed: 17141218, PubMed: 17170702, PubMed: 22607976, PubMed: 26471130, PubMed: 28827405). Component of the endoplasmic reticulum quality control (ERQC) system also called ER-associated degradation (ERAD) involved in ubiquitin- dependent degradation of misfolded endoplasmic reticulum proteins (PubMed: 12459480, PubMed: 12646171, PubMed: 12975321, PubMed: 14593114, PubMed: 16289116, PubMed: 16847254, PubMed: 17059562, PubMed: 17141218, PubMed: 17170702, PubMed: 22607976, PubMed: 26471130, PubMed: 28842558). Also promotes the degradation of normal but naturally short-lived proteins such as SGK. Protects cells from ER stress-induced apoptosis. Protects neurons from apoptosis induced by polyglutamine-expanded huntingtin (HTT) or unfolded GPR37 by promoting their degradation (PubMed: 17141218). Sequesters p53/TP53 in the cytoplasm and promotes its degradation, thereby negatively regulating its biological function in transcription, cell cycle regulation and apoptosis (PubMed: 17170702). Mediates the ubiquitination and subsequent degradation of cytoplasmic NFE2L1 (By similarity). During the early stage of B cell development, required for degradation of the pre-B cell receptor (pre-BCR) complex, hence supporting further differentiation into mature B cells (By similarity).

Cellular Location

Endoplasmic reticulum membrane; Multi-pass membrane protein

Tissue Location

Ubiquitously expressed, with highest levels in liver and kidney (at protein level). Up-regulated in synovial tissues from patients with rheumatoid arthritis (at protein level)

Anti-SYVN1 / HRD1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
