

Anti-ATP5A1 / ATP Synthase Alpha Antibody
Rabbit Anti Human Polyclonal Antibody
Catalog # ALS18613**Specification**

Anti-ATP5A1 / ATP Synthase Alpha Antibody - Product Information

Application	WB, IHC-P
Primary Accession	P25705
Predicted	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	59751

Anti-ATP5A1 / ATP Synthase Alpha Antibody - Additional Information**Gene ID** 498**Alias Symbol** **ATP5A1****Other Names**

ATP5A1, ATP5AL2, ATP5A, HATP1, Mitochondrial ATP synthase, MOM2, ORM, OMR, ATPM

Target/Specificity

Human ATP5A1 / ATP Synthase Alpha

Reconstitution & Storage

Affinity purified

Precautions

Anti-ATP5A1 / ATP Synthase Alpha Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-ATP5A1 / ATP Synthase Alpha Antibody - Protein Information**Name** ATP5F1A ([HGNC:823](#))**Function**

Mitochondrial membrane ATP synthase (F(1)F(0) ATP synthase or Complex V) produces ATP from ADP in the presence of a proton gradient across the membrane which is generated by electron transport complexes of the respiratory chain. F-type ATPases consist of two structural domains, F(1) - containing the extramembraneous catalytic core, and F(0) - containing the membrane proton channel, linked together by a central stalk and a peripheral stalk. During catalysis, ATP synthesis in the catalytic domain of F(1) is coupled via a rotary mechanism of the central stalk subunits to proton translocation. Subunits alpha and beta form the catalytic core in F(1). Rotation of the central stalk against the surrounding alpha(3)beta(3) subunits leads to hydrolysis of ATP in three separate catalytic sites on the beta subunits. Subunit alpha does not bear the catalytic high-affinity ATP-binding sites (By similarity). Binds the bacterial siderophore enterobactin and can promote mitochondrial accumulation of enterobactin-derived iron ions (PubMed:30146159).

Cellular Location

Mitochondrion. Mitochondrion inner membrane {ECO:0000250|UniProtKB:P19483}; Peripheral membrane protein {ECO:0000250|UniProtKB:P19483}; Matrix side {ECO:0000250|UniProtKB:P19483}. Cell membrane; Peripheral membrane protein; Extracellular side. Note=Colocalizes with HRG on the cell surface of T-cells (PubMed:19285951).

Tissue Location

Fetal lung, heart, liver, gut and kidney. Expressed at higher levels in the fetal brain, retina and spinal cord

Anti-ATP5A1 / ATP Synthase Alpha Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
