

# **CDC25C Antibody**

Mouse Monoclonal Antibody (Mab)
Catalog # AM1908b

## **Specification**

# **CDC25C Antibody - Product Information**

Application WB,E
Primary Accession P30307

Other Accession <u>NP\_001781.2</u>, <u>NP\_073720.1</u>

Reactivity
Host

### **CDC25C Antibody - Additional Information**

#### Gene ID 995

## **Other Names**

M-phase inducer phosphatase 3, Dual specificity phosphatase Cdc25C, CDC25C

# **Target/Specificity**

This CDC25C monoclonal antibody is generated from mouse immunized with CDC25C recombinant protein.

#### **Dilution**

WB~~1:100

E~~Use at an assay dependent concentration.

### **Format**

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

# **Precautions**

CDC25C Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## **CDC25C Antibody - Protein Information**

#### Name CDC25C

**Function** Functions as a dosage-dependent inducer in mitotic control. Tyrosine protein phosphatase required for progression of the cell cycle (PubMed:8119945). When phosphorylated, highly effective in activating G2 cells into prophase (PubMed:8119945). Directly dephosphorylates

CDK1 and activates its kinase activity (PubMed:8119945).

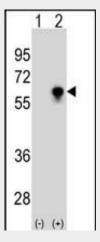

**Cellular Location** Nucleus

### **CDC25C Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# CDC25C Antibody - Images

Western blot analysis of CDC25C (arrow) using CDC25C Antibody (Cat. #AM1908b). 293 cell lysates (2  $\mu$ g/lane) either nontransfected (Lane 1) or transiently transfected (Lane 2) with the CDC25C gene.

# **CDC25C Antibody - Background**

This gene is highly conserved during evolution and it plays a key role in the regulation of cell division. The encoded protein is a tyrosine phosphatase and belongs to the Cdc25 phosphatase family. It directs dephosphorylation of cyclin B-bound CDC2 and triggers entry into mitosis. It is also thought to suppress p53-induced growth arrest. Multiple alternatively spliced transcript variants of this gene have been described, however, the full-length nature of many of them is not known. [provided by RefSeq].
