

LOX Antibody (Center)

Mouse Monoclonal Antibody (Mab)
Catalog # AM2166b

Specification

LOX Antibody (Center) - Product Information

Application WB,E
Primary Accession P28300

Other Accession <u>P16636</u>, <u>P45845</u>, <u>P28301</u>, <u>NP 002308.2</u>

Reactivity Human

Predicted Mouse, Pig, Rat

Host Mouse
Clonality Monoclonal
Isotype IgG2b
Calculated MW 46944
Antigen Region 234-260

LOX Antibody (Center) - Additional Information

Gene ID 4015

Other Names

Protein-lysine 6-oxidase, Lysyl oxidase, LOX

Target/Specificity

This LOX antibody is generated from mice immunized with a KLH conjugated synthetic peptide between 234-260 amino acids from the Central region of human LOX.

Dilution

WB~~1:500~1000

 $E\sim\sim$ Use at an assay dependent concentration.

Format

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

LOX Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

LOX Antibody (Center) - Protein Information

Name LOX

Tel: 858.875.1900 Fax: 858.875.1999

Function Responsible for the post-translational oxidative deamination of peptidyl lysine residues in precursors to fibrous collagen and elastin (PubMed: 26838787). Regulator of Ras expression. May play a role in tumor suppression. Plays a role in the aortic wall architecture (By similarity).

Cellular Location

Secreted. Secreted, extracellular space

Tissue Location

Heart, placenta, skeletal muscle, kidney, lung and pancreas.

LOX Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

LOX Antibody (Center) - Images

LOX Antibody (Center) (Cat. #AM2166b) western blot analysis in MDA-MB231 cell line lysates (35µg/lane). This demonstrates the LOX antibody detected the LOX protein (arrow).

LOX Antibody (Center) - Background

The protein encoded by this gene is an extracellular copper enzyme that initiates the crosslinking of collagens and elastin. The enzyme catalyzes oxidative deamination of the epsilon-amino group in certain lysine and hydroxylysine residues of collagens and lysine residues of elastin. In addition to crosslinking extracellular matrix proteins, the encoded protein may have a role in tumor suppression. Defects in this gene are a cause of autosomal recessive cutis laxa type I (CL type I). Two transcript variants encoding different isoforms have been found for this gene.
