

GDE1 Antibody
Purified Mouse Monoclonal Antibody (Mab)
Catalog # AM8683b

Specification

GDE1 Antibody - Product Information

Application	WB,E
Primary Accession	O9NZC3
Reactivity	Human
Predicted	Human
Host	Mouse
Clonality	monoclonal
Isotype	IgG1, κ
Calculated MW	37718

GDE1 Antibody - Additional Information

Gene ID 51573

Other Names

Glycerophosphodiester phosphodiesterase 1, 3.1.4.44, Membrane-interacting protein of RGS16, RGS16-interacting membrane protein, GDE1, MIR16

Target/Specificity

This GDE1 antibody is generated from a mouse immunized with a recombinant protein from the human region of human GDE1.

Dilution

WB~~1:2000
E~~Use at an assay dependent concentration.

Format

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

GDE1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

GDE1 Antibody - Protein Information

Name GDE1 ([HGNC:29644](#))

Function Hydrolyzes the phosphodiester bond of glycerophosphodiester such as glycerophosphoinositol (GroPIns) and glycerophosphoethanolamine (GroPEth), to yield a glycerol

phosphate and an alcohol (By similarity). Hydrolyzes glycerophospho-N-acylethanolamines to N-acylethanolamines in the brain and participates in bioactive N-acylethanolamine biosynthesis such as anandamide (an endocannabinoid), N-palmitoylethanolamine (an anti-inflammatory), and N-oleoylethanolamine (an anorexic). In addition, has a lysophospholipase D activity by hydrolyzing N-acyl-lysoplasmenylethanolamine (N-acyl-lysoPlsEt) to N-acylethanolamine. However lysophospholipase D activity is lower than glycerophosphodiester phosphodiesterase activity (By similarity). Has little or no activity towards glycerophosphocholine (By similarity).

Cellular Location

Cell membrane {ECO:0000250|UniProtKB:Q9JL55}; Multi-pass membrane protein. Cytoplasmic vesicle membrane {ECO:0000250|UniProtKB:Q9JL55}; Multi-pass membrane protein.
Note=Perinuclear vesicles and cell membrane {ECO:0000250|UniProtKB:Q9JL55}

Tissue Location

Widely expressed..

GDE1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

GDE1 Antibody - Images

Anti-GDE1 Antibody at 1:2000 dilution + human brain tissue lysate Lysates/proteins at 20 µg per lane. Secondary Goat Anti-mouse IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 38 kDa Blocking/Dilution buffer: 5% NFDm/TBST.

GDE1 Antibody - Background

Has glycerophosphoinositol phosphodiesterase activity. Has little or no activity towards glycerophosphocholine. GDE1 activity can be modulated by G-protein signaling pathways (By similarity).
