Anti-TRAIL R3 Antibody - Images**Anti-TRAIL R3 Antibody - Background**

DcR1 / TRAIL-R3 / TRID / LIT is one of the two putative decoy receptors identified for TRAIL, one of the members of TNF family of apoptosis inducing proteins. The other putative decoy receptor is called DcR2 / TRUND / TRAIL-R4. DcR1 is attached to the cell surface through glycosphospholipid anchor. It has the extracellular TRAIL binding domain but lacks the cytoplasmic domain to induce

apoptotic signal. Hence overexpression of DcR1 inhibits the TRAIL induced apoptosis.
