

Anti-Adrenergic Receptor Alpha 2c Antibody

Catalog # AN2169

Specification

Anti-Adrenergic Receptor Alpha 2c Antibody - Product Information

Application WB
Primary Accession P18825
Reactivity Bovine
Host Rabbit

Clonality Rabbit Polyclonal

Isotype IgG
Calculated MW 49522

Anti-Adrenergic Receptor Alpha 2c Antibody - Additional Information

Gene ID 152

Other Names

ADRA2C, Alpha-2C adrenoreceptor, Alpha-2C adrenergic receptor, Alpha-2 adrenergic receptor subtype C4, ADRA2L2, ADRA2RL2

Dilution

WB~~1:1000

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Anti-Adrenergic Receptor Alpha 2c Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Shipping

Blue Ice

Anti-Adrenergic Receptor Alpha 2c Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Anti-Adrenergic Receptor Alpha 2c Antibody - Background

The alpha-2-adrenergic receptor is a member of the G protein-coupled receptor superfamily. There are 3 highly homologous subtypes: alpha2A, alpha2B, and alpha2C. These receptors have a critical role in regulating neurotransmitter release from sympathetic nerves and from adrenergic neurons in the central nervous system. Alpha2C is required for normal presynaptic control of transmitter release from sympathetic nerves in the heart and from central noradrenergic neurons.
