

**KRT13 Antibody**  
**Purified Mouse Monoclonal Antibody**  
**Catalog # AO1741a****Specification****KRT13 Antibody - Product Information**

Application	WB, FC, E
Primary Accession	<a href="#">P13646</a>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	52kDa KDa

**Description**

The protein encoded by this gene is a member of the keratin gene family. The keratins are intermediate filament proteins responsible for the structural integrity of epithelial cells and are subdivided into cytokeratins and hair keratins. Most of the type I cytokeratins consist of acidic proteins which are arranged in pairs of heterotypic keratin chains. This type I cytokeratin is paired with keratin 4 and expressed in the suprabasal layers of non-cornified stratified epithelia. Mutations in this gene and keratin 4 have been associated with the autosomal dominant disorder White Sponge Nevus. The type I cytokeratins are clustered in a region of chromosome 17q21.2. Alternative splicing of this gene results in multiple transcript variants; however, not all variants have been described.

**Immunogen**

Purified recombinant fragment of human KRT13 (AA: 143-295) expressed in E. Coli.

**Formulation**

Purified antibody in PBS with 0.05% sodium azide

**KRT13 Antibody - Additional Information**

**Gene ID** 3860

**Other Names**

Keratin, type I cytoskeletal 13, Cytokeratin-13, CK-13, Keratin-13, K13, KRT13

**Dilution**

WB~~1/500 - 1/2000

FC~~1/200 - 1/400

E~~1/10000

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

KRT13 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## KRT13 Antibody - Protein Information

**Name** KRT13

### Function

Type 1 keratin (Probable). Maintains postnatal tongue mucosal cell homeostasis and tissue organization in response to mechanical stress, potentially via regulation of the G1/S phase cyclins CCNE1 and CCNE2 (By similarity).

### Tissue Location

Expressed in some epidermal sweat gland ducts (at protein level) and in exocervix, esophagus and placenta

## KRT13 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Figure 1: Western blot analysis using KRT13 mAb against human KRT13 recombinant protein. (Expected MW is 43.4 kDa)

Figure 2: Western blot analysis using KRT13 mouse mAb against T47D (1) cell lysate.

Figure 3: Flow cytometric analysis of HeLa cells using KRT13 mouse mAb (green) and negative control (red).
