PROC Antibody
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP1017a

Specification

PROC Antibody - Product Information

Application WB,E
Primary Accession P04070
Reactivity Human
Predicted Human
Host Rabbit
Clonality Polyclonal
Isotype Rabbit Ig

PROC Antibody - Additional Information

Gene ID 5624

Other Names

Target/Specificity
KLH conjugated synthetic peptide encoding the Protein-C epitope tag (CEDQVDPRLIDGK) was used as antigen.

Dilution
WB~~1:1000

Format
Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage
Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions
PROC Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Western blot analysis of anti-Protein-C tag Pab (Cat. #AP1017a)in Protein-C-tagged recombinant protein bacterial lysate.

Anti-PROC Antibody at 1:1000 dilution + H.plasma whole cell lysate Lysates/proteins at 20 µg per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 52 kDa Blocking/Dilution buffer: 5% NFDM/TBST.
PROC Antibody - Protein Information

Name PROC

Function

Cellular Location
Secreted. Golgi apparatus Endoplasmic reticulum

Tissue Location
Plasma; synthesized in the liver.

PROC Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytometry
- Cell Culture

Epitope tags consisting of short sequences recognized by well-characterized antibodies have been widely used in the study of protein expression in various systems. The epitope tag composed of a 12 residue peptide, EDQVDPRLIDGK, is derived from Protein-C, a vitamin K-dependent serine protease that regulates blood coagulation by inactivating factors Va and VIIIa in the presence of calcium ions and phospholipids. Abgent's anti-Protein-C polyclonal antibody provides a simple solution to detect the expression of a Protein-C epitope-tagged protein in cells.
