

RPL27A Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP10937b

Specification

RPL27A Antibody (C-term) - Product Information

Application	WB, IHC-P, FC,E
Primary Accession	P46776
Other Accession	P18445 , P14115 , O4R723 , O56K03 , NP_000981.1
Reactivity	Human, Hamster
Predicted	Bovine, Monkey, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	16561
Antigen Region	110-138

RPL27A Antibody (C-term) - Additional Information

Gene ID 6157

Other Names

60S ribosomal protein L27a, RPL27A

Target/Specificity

This RPL27A antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 110-138 amino acids from the C-terminal region of human RPL27A.

Dilution

WB~~1:1000
IHC-P~~1:50~100
FC~~1:10~50

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

RPL27A Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

RPL27A Antibody (C-term) - Protein Information

Name RPL27A

Function Component of the large ribosomal subunit (PubMed:[23636399](#), PubMed:[32669547](#)). The ribosome is a large ribonucleoprotein complex responsible for the synthesis of proteins in the cell (PubMed:[23636399](#), PubMed:[32669547](#)).

Cellular Location

Cytoplasm.

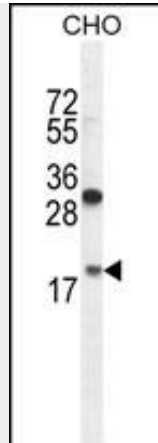

RPL27A Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

RPL27A Antibody (C-term) - Images

RPL27A Antibody (C-term) (Cat. #AP10937b) western blot analysis in K562 cell line lysates (35ug/lane). This demonstrates the RPL27A antibody detected the RPL27A protein (arrow).

RPL27A Antibody (C-term) (Cat. #AP10937b) western blot analysis in CHO cell line lysates (35ug/lane). This demonstrates the RPL27A antibody detected the RPL27A protein (arrow).

RPL27A Antibody (C-term) (Cat. #AP10937b) immunohistochemistry analysis in formalin fixed and paraffin embedded human hepatocarcinoma followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of the RPL27A Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

RPL27A Antibody (C-term) (Cat. #AP10937b) flow cytometric analysis of K562 cells (right histogram) compared to a negative control cell (left histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

RPL27A Antibody (C-term) - Background

Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable expression of this gene in colorectal cancers compared to adjacent normal tissues has been observed, although no correlation between the level of expression and the severity of the disease has been found. As is typical for genes encoding ribosomal proteins, multiple processed pseudogenes derived from this gene are dispersed through the genome.
