

#### **CL029 Antibody (N-term)**

**Affinity Purified Rabbit Polyclonal Antibody (Pab)** Catalog # AP11154a

## **Specification**

### CL029 Antibody (N-term) - Product Information

**Application** IF, WB, IHC-P, FC,E

**Primary Accession 08N999** 

NP 001009894.2 Other Accession Human, Mouse Reactivity

Host **Rabbit** Clonality **Polyclonal** Isotype Rabbit IgG Calculated MW 37490

Antigen Region 61-89

### CL029 Antibody (N-term) - Additional Information

#### **Gene ID 91298**

#### **Other Names**

Uncharacterized protein C12orf29, C12orf29

#### Target/Specificity

This CL029 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 61-89 amino acids from the N-terminal region of human CL029.

# **Dilution**

IF~~1:10~50 WB~~1:1000 IHC-P~~1:50~100 FC~~1:10~50

### **Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

### **Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

CL029 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

#### CL029 Antibody (N-term) - Protein Information

Name RLIG1 (HGNC:25322)

**Function** Functions as an RNA ligase, in vitro (PubMed:<u>36792600</u>). The ligation reaction entails three nucleotidyl transfer steps (PubMed:<u>36792600</u>). In the first step, the RNA ligase reacts with ATP in the absence of nucleic acid to form a covalent ligase-AMP intermediate and release pyrophosphate (PubMed:<u>36792600</u>). In step 2, the ligase-AMP binds to the nucleic acid and transfers the adenylate to the 5'-PO4 terminus to form an adenylylated intermediate (PubMed:<u>36792600</u>). In step 3, the RNA ligase directs the attack of the 3'-OH on the 5'-phosphoanhydride linkage, resulting in a repaired 3'-5' phosphodiester and release of AMP (PubMed:<u>36792600</u>). Exhibits selectivity for single- stranded RNA substrates and may not have nick-sealing activity on double-stranded DNA-RNA hybrids (PubMed:<u>36792600</u>). May play a role in maintaining RNA integrity under stress conditions, for example in response to reactive oxygen species (ROS) (PubMed:<u>36792600</u>).

## CL029 Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## CL029 Antibody (N-term) - Images

Confocal immunofluorescent analysis of CL029 Antibody (N-term)(Cat#AP11154a) with NCI-H460 cell followed by Alexa Fluor 488-conjugated goat anti-rabbit IgG (green). DAPI was used to stain the cell nuclear (blue).

CL029 Antibody (N-term) (Cat. #AP11154a) western blot analysis in NCI-H460 cell line lysates (35ug/lane). This demonstrates the CL029 antibody detected the CL029 protein (arrow).

CL029 Antibody (N-term) (Cat. #AP11154a) western blot analysis in mouse bladder tissue lysates (35ug/lane). This demonstrates the CL029 antibody detected the CL029 protein (arrow).

CL029 Antibody (N-term) (Cat. #AP11154a)immunohistochemistry analysis in formalin fixed and paraffin embedded human pancreas tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of CL029 Antibody (N-term) for immunohistochemistry. Clinical relevance has not been evaluated.

CL029 Antibody (N-term) (Cat. #AP11154a) flow cytometric analysis of NCI-H460 cells (right histogram) compared to a negative control cell (left histogram).FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

# CL029 Antibody (N-term) - Background

May be required for endoplasmic reticulum organization (By similarity).
