

#### RAD54 Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP11971b

#### Specification

## **RAD54 Antibody (C-term) - Product Information**

Application Primary Accession Other Accession Reactivity Predicted Host Clonality Isotype Calculated MW Antigen Region FC, WB,E <u>O92698</u> <u>P70270</u>, <u>O12944</u>, <u>NP\_003570</u> Human Chicken, Mouse Rabbit Polyclonal Rabbit IgG 84352 634-663

#### **RAD54 Antibody (C-term) - Additional Information**

Gene ID 8438

**Other Names** DNA repair and recombination protein RAD54-like, 364-, RAD54 homolog, hHR54, hRAD54, RAD54L, RAD54A

#### Target/Specificity

This RAD54 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 634-663 amino acids from the C-terminal region of human RAD54.

**Dilution** FC~~1:10~50 WB~~1:1000 E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

#### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

RAD54 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

### **RAD54 Antibody (C-term) - Protein Information**

### Name RAD54L

## Synonyms RAD54A

**Function** Plays an essential role in homologous recombination (HR) which is a major pathway for repairing DNA double-strand breaks (DSBs), single-stranded DNA (ssDNA) gaps, and stalled or collapsed replication forks (PubMed:<u>11459989</u>, PubMed:<u>12205100</u>, PubMed:<u>24798879</u>, PubMed:<u>27264870</u>, PubMed:<u>32457312</u>, PubMed:<u>9774452</u>). Acts as a molecular motor during the homology search and guides RAD51 ssDNA along a donor dsDNA thereby changing the homology search from the diffusion-based mechanism to a motor-guided mechanism. Also plays an essential role in RAD51-mediated synaptic complex formation which consists of three strands encased in a protein filament formed once homology is recognized. Once DNA strand exchange occured, dissociates RAD51 from nucleoprotein filaments formed on dsDNA (By similarity).

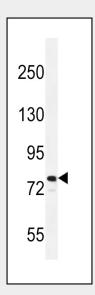

**Cellular Location** Nucleus.

# RAD54 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

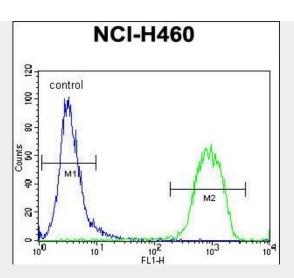

- <u>Western Blot</u>
- <u>Blocking Peptides</u>
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

# RAD54 Antibody (C-term) - Images

RAD54 Antibody (C-term) (Cat. #AP11971b) western blot analysis in NCI-H460 cell line lysates (35ug/lane).This demonstrates the RAD54 antibody detected the RAD54 protein (arrow).

RAD54 Antibody (C-term) (Cat. #AP11971b) flow cytometric analysis of NCI-H460 cells (right histogram) compared to a negative control cell (left histogram).FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

#### RAD54 Antibody (C-term) - Background

The protein encoded by this gene belongs to the DEAD-like helicase superfamily, and shares similarity with Saccharomyces cerevisiae Rad54, a protein known to be involved in the homologous recombination and repair of DNA. This protein has been shown to play a role in homologous recombination related repair of DNA double-strand breaks. The binding of this protein to double-strand DNA induces a DNA topological change, which is thought to facilitate homologous DNA paring, and stimulate DNA recombination. Alternative splicing results in multiple transcript variants encoding the same protein.
