

FSTL3 Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP12300b

Specification

FSTL3 Antibody (C-term) - Product Information

Application	WB, IHC-P,E
Primary Accession	O95633
Other Accession	NP_005851.1
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	229-258

FSTL3 Antibody (C-term) - Additional Information

Gene ID 10272

Other Names

Follistatin-related protein 3, Follistatin-like protein 3, Follistatin-related gene protein, FSTL3, FLRG

Target/Specificity

This FSTL3 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 229-258 amino acids from the C-terminal region of human FSTL3.

Dilution

WB~~1:2000

IHC-P~~1:25

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

FSTL3 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

FSTL3 Antibody (C-term) - Protein Information

Name FSTL3

Synonyms FLRG

Function Isoform 1 or the secreted form is a binding and antagonizing protein for members of the TGF-beta family, such as activin, BMP2 and MSTN. Inhibits activin A-, activin B-, BMP2- and MSDT-induced cellular signaling; more effective on activin A than on activin B. Involved in bone formation; inhibits osteoclast differentiation. Involved in hematopoiesis; involved in differentiation of hemopoietic progenitor cells, increases hematopoietic cell adhesion to fibronectin and seems to contribute to the adhesion of hematopoietic precursor cells to the bone marrow stroma. Isoform 2 or the nuclear form is probably involved in transcriptional regulation via interaction with MLLT10.

Cellular Location

[Isoform 1]: Secreted.

Tissue Location

Expressed in a wide range of tissues.

FSTL3 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

FSTL3 Antibody (C-term) - Images

FSTL3 Antibody (C-term) (Cat. #AP12300b) western blot analysis in CEM cell line lysates (35ug/lane). This demonstrates the FSTL3 antibody detected the FSTL3 protein (arrow).

Anti-FSTL3 Antibody (C-term) at 1:1000 dilution + A431 whole cell lysate Lysates/proteins at 20 μ g per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 28 kDa Blocking/Dilution buffer: 5% NFDM/TBST.

Anti-FSTL3 Antibody (C-term) at 1:2000 dilution + HepG2 whole cell lysate Lysates/proteins at 20 μ g per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 28 kDa Blocking/Dilution buffer: 5% NFDM/TBST.

AP12300B staining FSTL3 in human testis tissue sections by Immunohistochemistry (IHC-P - paraformaldehyde-fixed, paraffin-embedded sections). Tissue was fixed with formaldehyde and blocked with 3% BSA for 0.5 hour at room temperature; antigen retrieval was by heat mediation with a citrate buffer (pH6). Samples were incubated with primary antibody (1/25) for 1 hour at 37°C. A undiluted biotinylated goat polyvalent antibody was used as the secondary antibody.

FSTL3 Antibody (C-term) - Background

Follistatin-like 3 is a secreted glycoprotein of the follistatin-module-protein family. It may have a role in leukemogenesis.
