## PCCA Antibody (Center) - Additional Information

## Gene ID 5095

Other Names
Propionyl-CoA carboxylase alpha chain, mitochondrial, PCCase subunit alpha,
Propanoyl-CoA:carbon dioxide ligase subunit alpha, PCCA
Target/Specificity
This PCCA antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 362-390 amino acids from the Central region of human PCCA.

## Dilution

WB~~1:2000
IHC-P~~1:25

Format
Purified polyclonal antibody supplied in PBS with $0.09 \%$ (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

## Storage

Maintain refrigerated at $2-8^{\circ} \mathrm{C}$ for up to 2 weeks. For long term storage store at $-20^{\circ} \mathrm{C}$ in small aliquots to prevent freeze-thaw cycles.

## Precautions

PCCA Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

PCCA Antibody (Center) - Protein Information

Name PCCA (HGNC:8653)

Function This is one of the 2 subunits of the biotin-dependent propionyl-CoA carboxylase (PCC), a mitochondrial enzyme involved in the catabolism of odd chain fatty acids, branched-chain amino acids isoleucine, threonine, methionine, and valine and other metabolites (PubMed:8434582, PubMed:6765947). Propionyl-CoA carboxylase catalyzes the carboxylation of propionyl-CoA/propanoyl-CoA to D-methylmalonyl- CoA/(S)-methylmalonyl-CoA (PubMed:8434582, PubMed: 6765947 , PubMed:10101253). Within the holoenzyme, the alpha subunit catalyzes the ATP-dependent carboxylation of the biotin carried by the biotin carboxyl carrier (BCC) domain, while the beta subunit then transfers the carboxyl group from carboxylated biotin to propionyl-CoA (By similarity). Propionyl-CoA carboxylase also significantly acts on butyryl-CoA/butanoyl-CoA, which is converted to ethylmalonyl-CoA/(2S)- ethylmalonyl-CoA at a much lower rate (PubMed:6765947). Other alternative minor substrates include (2E)-butenoyl-CoA/crotonoyl-CoA (By similarity).

Tissue was fixed with formaldehyde and blocked with $3 \%$ BSA for 0.5 hour at room temperature; antigen retrieval was by heat mediation with a citrate buffer ( pH 6 ). Samples were incubated with primary antibody ( $1 / 25$ ) for 1 hours at $37^{\circ} \mathrm{C}$. A undiluted biotinylated goat polyvalent antibody was used as the secondary antibody.

## PCCA Antibody (Center) - Background

The protein encoded by this gene is the alpha subunit of the heterodimeric mitochondrial enzyme Propionyl-CoA carboxylase. PCCA encodes the biotin-binding region of this enzyme. Mutations in either PCCA or PCCB (encoding the beta subunit) lead to an enzyme deficiency resulting in propionic acidemia. Multiple transcript variants encoding different isoforms have been found for this gene.
