

## EEF1A2 Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP12557b

### **Specification**

## EEF1A2 Antibody (C-term) - Product Information

Application IHC-P, WB,E Primary Accession Q05639

Other Accession <u>P62632</u>, <u>Q71V39</u>, <u>P62631</u>, <u>Q32PH8</u>,

NP\_001949.1

Reactivity

Predicted Bovine, Rabbit, Rat

Host Rabbit
Clonality Polyclonal
Isotype Rabbit IgG
Calculated MW 50470
Antigen Region 366-395

## EEF1A2 Antibody (C-term) - Additional Information

#### **Gene ID 1917**

## **Other Names**

Elongation factor 1-alpha 2, EF-1-alpha-2, Eukaryotic elongation factor 1 A-2, eEF1A-2, Statin-S1, EEF1A2, EEF1AL, STN

### Target/Specificity

This EEF1A2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 366-395 amino acids from the C-terminal region of human EEF1A2.

## **Dilution**

IHC-P~~1:10~50 WB~~1:1000

E~~Use at an assay dependent concentration.

### **Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

### **Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

EEF1A2 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

## **EEF1A2** Antibody (C-term) - Protein Information

Name EEF1A2 {ECO:0000303|PubMed:10950927, ECO:0000312|HGNC:HGNC:3192}

**Function** Translation elongation factor that catalyzes the GTP- dependent binding of aminoacyl-tRNA (aa-tRNA) to the A-site of ribosomes during the elongation phase of protein synthesis. Base pairing between the mRNA codon and the aa-tRNA anticodon promotes GTP hydrolysis, releasing the aa-tRNA from EEF1A1 and allowing its accommodation into the ribosome (By similarity). The growing protein chain is subsequently transferred from the P-site peptidyl tRNA to the A-site aa-tRNA, extending it by one amino acid through ribosome- catalyzed peptide bond formation (By similarity).

**Cellular Location**Endoplasmic reticulum membrane

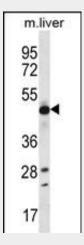

**Tissue Location**Brain, heart, and skeletal muscle.

## **EEF1A2 Antibody (C-term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

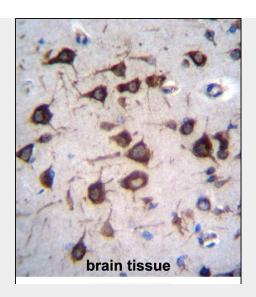

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# EEF1A2 Antibody (C-term) - Images

EEF1A2 Antibody (C-term) (Cat. #AP12557b) western blot analysis in mouse liver tissue lysates (35ug/lane). This demonstrates the EEF1A2 antibody detected the EEF1A2 protein (arrow).

EEF1A2 Antibody (C-term) (Cat. #AP12557b)immunohistochemistry analysis in formalin fixed and paraffin embedded human brain tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of EEF1A2 Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

# EEF1A2 Antibody (C-term) - Background

This gene encodes an isoform of the alpha subunit of the elongation factor-1 complex, which is responsible for the enzymatic delivery of aminoacyl tRNAs to the ribosome. This isoform (alpha 2) is expressed in brain, heart and skeletal muscle, and the other isoform (alpha 1) is expressed in brain, placenta, lung, liver, kidney, and pancreas. This gene may be critical in the development of ovarian cancer. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
