

EMP2 Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP13581b**Specification**

EMP2 Antibody (C-term) - Product Information

Application	WB, IHC-P,E
Primary Accession	P54851
Other Accession	NP_001415.1
Reactivity	Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	100-129

EMP2 Antibody (C-term) - Additional Information**Gene ID** 2013**Other Names**

Epithelial membrane protein 2, EMP-2, Protein XMP, EMP2, XMP

Target/Specificity

This EMP2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 100-129 amino acids from the C-terminal region of human EMP2.

Dilution

WB~~1:1000

IHC-P~~1:10~50

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

EMP2 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

EMP2 Antibody (C-term) - Protein Information**Name** EMP2**Synonyms** XMP

Function Functions as a key regulator of cell membrane composition by regulating protein surface expression. Also, plays a role in regulation of processes including cell migration, cell proliferation, cell contraction and cell adhesion. Regulates transepithelial migration of neutrophils into the alveolar lumen, potentially via mediation of cell surface expression of adhesion markers and lipid raft formation (By similarity). Negatively regulates caveolae formation by reducing CAV1 expression and CAV1 amount by increasing lysosomal degradation (PubMed:[24814193](#)). Facilitates surface trafficking and formation of lipid rafts bearing GPI-anchor proteins (By similarity). Regulates surface expression of MHC1 and ICAM1 proteins increasing susceptibility to T-cell mediated cytotoxicity (By similarity). Regulates the plasma membrane expression of the integrin heterodimers ITGA6-ITGB1, ITGA5- ITGB3 and ITGA5-ITGB1 resulting in modulation of cell-matrix adhesion (PubMed:[16216233](#)). Also regulates many processes through PTK2. Regulates blood vessel endothelial cell migration and angiogenesis by regulating VEGF protein expression through PTK2 activation (PubMed:[23439602](#)). Regulates cell migration and cell contraction through PTK2 and SRC activation (PubMed:[21637765](#), PubMed:[22728127](#)). Regulates focal adhesion density, F-actin conformation and cell adhesion capacity through interaction with PTK2 (PubMed:[19494199](#)). Positively regulates cell proliferation (PubMed:[24814193](#)). Plays a role during cell death and cell blebbing (PubMed:[12107182](#)). Promotes angiogenesis and vasculogenesis through induction of VEGFA via a HIF1A- dependent pathway (PubMed:[23334331](#)). Also plays a role in embryo implantation by regulating surface trafficking of integrin heterodimer ITGA5-ITGB3 (PubMed:[16487956](#)). Plays a role in placental angiogenesis and uterine natural killer cell regulation at the maternal-fetal placental interface, however not required in the maternal tissues for a viable pregnancy (By similarity). Involved in the early stages of embryogenic development and cardiogenesis, potentially via regulation of epithelial-mesenchymal transition timing (By similarity). May play a role in glomerular filtration (By similarity).

Cellular Location

Golgi apparatus membrane; Multi-pass membrane protein. Cell membrane. Apical cell membrane {ECO:0000250|UniProtKB:O88662}. Membrane raft. Cytoplasm Nucleus {ECO:0000250|UniProtKB:Q66HH2}. Cytoplasm, perinuclear region {ECO:0000250|UniProtKB:O88662}. Note=Localizes in cytoplasm, foot processes and cell bodies of podocytes and nucleus of endothelial cells of kidney. Localizes to the apical cell surface in the luminal epithelium and glandular epithelium. Colocalized with ITGB1 and GPI- anchor proteins on plasma membrane. {ECO:0000250|UniProtKB:O88662, ECO:0000250|UniProtKB:Q66HH2}

Tissue Location

Expressed in ciliary body epithelia, sclera, cornea, and retinal pigment epithelium (at protein level) (PubMed:12710941). Expressed in lung and endometrial tissue; expression is particularly abundant in secretory endometrium (at protein level) (PubMed:12710941). Expressed in placental villous syncytiotrophoblasts and cytotrophoblasts and on the membrane of interstitial trophoblasts (at protein level) (PubMed:28295343).

EMP2 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

EMP2 Antibody (C-term) - Images

EMP2 Antibody (C-term) (Cat. #AP13581b) western blot analysis in mouse lung tissue lysates (35ug/lane). This demonstrates the EMP2 antibody detected the EMP2 protein (arrow).

EMP2 Antibody (C-term) (Cat. #AP13581b) immunohistochemistry analysis in formalin fixed and paraffin embedded human kidney tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of EMP2 Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

EMP2 Antibody (C-term) - Background

The function of this protein remains unknown.
