

TCEB3 Antibody (Center)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP14198c**Specification**

TCEB3 Antibody (Center) - Product Information

Application	WB,E
Primary Accession	Q14241
Other Accession	NP_003189.2
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	87230
Antigen Region	253-282

TCEB3 Antibody (Center) - Additional Information**Gene ID** 6924**Other Names**

Transcription elongation factor B polypeptide 3, Elongin 110 kDa subunit, Elongin-A, EloA, RNA polymerase II transcription factor SIII subunit A1, SIII p110, TCEB3

Target/Specificity

This TCEB3 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 253-282 amino acids from the Central region of human TCEB3.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

TCEB3 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

TCEB3 Antibody (Center) - Protein Information**Name** ELOA ([HGNC:11620](#))

Synonyms TCEB3

Function SIII, also known as elongin, is a general transcription elongation factor that increases the RNA polymerase II transcription elongation past template-encoded arresting sites. Subunit A is transcriptionally active and its transcription activity is strongly enhanced by binding to the dimeric complex of the SIII regulatory subunits B and C (elongin BC complex).

Cellular Location

Nucleus. Note=Localizes to sites of DNA damage.

TCEB3 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

TCEB3 Antibody (Center) (Cat. #AP14198c) western blot analysis in HeLa cell line lysates (35ug/lane). This demonstrates the TCEB3 antibody detected the TCEB3 protein (arrow).

TCEB3 Antibody (Center) - Background

This gene encodes the protein elongin A, which is a subunit of the transcription factor B (SIII) complex. The SIII complex is composed of elongins A/A2, B and C. It activates elongation by RNA polymerase II by suppressing transient pausing of the polymerase at many sites within transcription units. Elongin A functions as the transcriptionally active component of the SIII complex, whereas elongins B and C are regulatory subunits. Elongin A2 is specifically expressed in the testis, and capable of forming a stable complex with elongins B and C. The von Hippel-Lindau tumor suppressor protein binds to elongins B and C, and thereby inhibits

transcription elongation.
