

SWAP70 Antibody (Center)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP1441c

Specification

SWAP70 Antibody (Center) - Product Information

Application Primary Accession Other Accession Reactivity Predicted Host Clonality Isotype Calculated MW Antigen Region WB,E <u>O9UH65</u> <u>O6A028</u>, <u>P0C1G6</u> Human Bovine, Mouse Rabbit Polyclonal Rabbit IgG 68998 227-256

SWAP70 Antibody (Center) - Additional Information

Gene ID 23075

Other Names Switch-associated protein 70, SWAP-70, SWAP70, KIAA0640

Target/Specificity

This SWAP70 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 227-256 amino acids from the Central region of human SWAP70.

Dilution WB~~1:1000 E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions SWAP70 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

SWAP70 Antibody (Center) - Protein Information

Name SWAP70

Synonyms KIAA0640

Function Phosphatidylinositol 3,4,5-trisphosphate-dependent guanine nucleotide exchange factor (GEF) which, independently of RAS, transduces signals from tyrosine kinase receptors to RAC. It also mediates signaling of membrane ruffling. Regulates the actin cytoskeleton as an effector or adapter protein in response to agonist stimulated phosphatidylinositol (3,4)-bisphosphate production and cell protrusion (By similarity).

Cellular Location

Cytoplasm. Cell membrane. Nucleus. Cell projection, lamellipodium. Cytoplasm, cytoskeleton. Note=In resting B-cells it is localized mainly in the cytoplasm and upon cell activation it is recruited to the plasma membrane and then translocates to the nucleus (PubMed:10681448) In activated, class-switching B-cells it is associated with membrane IgG but not IgM (PubMed:10681448). Localized to loose actin filament arrays located behind actively extending lamellipodia (PubMed:12925760).

Tissue Location

Expressed only in mature B-cells including those associated with mucosa-associated tissue and bronchus-associated tissue (PubMed:10681448). Widely expressed. Abundant in spleen, and fairly abundant in kidney, lung and liver. Also found in monocytes and macrophages (PubMed:12925760).

SWAP70 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

SWAP70 Antibody (Center) - Images

Western blot analysis of SWAP70 (arrow) using rabbit polyclonal SWAP70 Antibody (Center) (Cat# AP1441c). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected with the SWAP70 gene (Lane 2) (Origene Technologies).

Western blot analysis of anti-SWAP70 Antibody (Center) (Cat# AP1441c) in HepG2 cell line lysates (35ug/lane). SWAP70(arrow) was detected using the purified polyclonal antibody.

SWAP70 Antibody (Center) - Background

SWAP70 is a phosphatidylinositol 3,4,5-trisphosphate-dependent guanine nucleotide exchange factor (GEF) which, independently of RAS, transduces signals from tyrosine kinase receptors to RAC. It also mediates signaling of membrane ruffling. This protein regulates the actin cytoskeleton as an effector or adapter protein in response to agonist stimulated phosphatidylinositol (3,4)-bisphosphate production and cell protrusion.
