

## **HNMT Antibody (N-term)**

Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP1442A

### **Specification**

## **HNMT Antibody (N-term) - Product Information**

Application IHC-P, WB, IF,E

Primary Accession
Reactivity
Human
Host
Clonality
Isotype
Calculated MW
Antigen Region
P50135
Human
Rabbit
Polyclonal
Rabbit IgG
33295
Antigen Region
29-58

### **HNMT Antibody (N-term) - Additional Information**

#### **Gene ID 3176**

### **Other Names**

Histamine N-methyltransferase, HMT, HNMT

# **Target/Specificity**

This HNMT antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 29-58 amino acids from the N-terminal region of human HNMT.

#### **Dilution**

IHC-P~~1:10~50 WB~~1:1000 IF~~1:10~50

E~~Use at an assay dependent concentration.

#### **Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

#### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

HNMT Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

# **HNMT Antibody (N-term) - Protein Information**

#### Name HNMT

**Function** Inactivates histamine by N-methylation. Plays an important role in degrading histamine and in regulating the airway response to histamine.

**Cellular Location** Cytoplasm.

## **HNMT Antibody (N-term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## **HNMT Antibody (N-term) - Images**

Confocal immunofluorescent analysis of HNMT Antibody (N-term)(Cat#AP1442a) with Hela cell followed by Alexa Fluor 488-conjugated goat anti-rabbit IgG (green).DAPI was used to stain the cell nuclear (blue).

Western blot analysis of HNMT Antibody (N-term) (Cat# AP1442a) in Hela cell line lysates (35ug/lane). HNMT(arrow) was detected using the purified polyclonal antibody.

Formalin-fixed and paraffin-embedded human hepatocarcinoma tissue reacted with HNMT antibody (N-term) (Cat.#AP1442a), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

# HNMT Antibody (N-term) - Background

In mammals, histamine is metabolized by two major pathways: N(tau)-methylation via histamine N-methyltransferase and oxidative deamination via diamine oxidase. HNMT is the first enzyme which is found in the cytosol and uses S-adenosyl-L-methionine as the methyl donor. In the mammalian brain, the neurotransmitter activity of histamine is controlled by N(tau)-methylation as diamine oxidase is not found in the central nervous system. A common genetic polymorphism affects the activity levels of this gene product in red blood cells.
