CDCA8 Antibody (Center)<br>Purified Rabbit Polyclonal Antibody (Pab)<br>Catalog \# AP1447c

## Specification

## CDCA8 Antibody (Center) - Product Information

Application<br>WB,E<br>Primary Accession<br>Q53HL2<br>Reactivity<br>Human<br>Host<br>Rabbit<br>Clonality<br>Isotype<br>Antigen Region<br>\section*{Polyclonal}<br>Rabbit IgG<br>115-144

## CDCA8 Antibody (Center) - Additional Information

## Gene ID 55143

## Other Names

Borealin, Cell division cycle-associated protein 8, Dasra-B, hDasra-B, Pluripotent embryonic stem cell-related gene 3 protein, CDCA8, PESCRG3

Target/Specificity
This CDCA8 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 115-144 amino acids from the Central region of human CDCA8.

## Dilution

WB~~1:2000

## Format

Purified polyclonal antibody supplied in PBS with $0.09 \%$ (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

## Storage

Maintain refrigerated at $2-8^{\circ} \mathrm{C}$ for up to 2 weeks. For long term storage store at $-20^{\circ} \mathrm{C}$ in small aliquots to prevent freeze-thaw cycles.

## Precautions

CDCA8 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

## CDCA8 Antibody (Center) - Protein Information

## Name CDCA8

Synonyms PESCRG3
Function Component of the chromosomal passenger complex (CPC), a complex that acts as a key
regulator of mitosis. The CPC complex has essential functions at the centromere in ensuring correct chromosome alignment and segregation and is required for chromatin-induced microtubule stabilization and spindle assembly. Major effector of the TTK kinase in the control of attachment-error-correction and chromosome alignment.

## Cellular Location

Nucleus, nucleolus. Cytoplasm. Cytoplasm, cytoskeleton, spindle. Chromosome, centromere. Note=Localizes on chromosome arms and inner centromeres from prophase through metaphase and then transferring to the spindle midzone and midbody from anaphase through cytokinesis Colocalizes with SENP3 in the nucleolus in interphase cells

## CDCA8 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

CDCA8 Antibody (Center) - Images

Anti-CDCA8 Antibody (Center) at 1:2000 dilution + THP-1 whole cell lysate Lysates/proteins at 20 $\mu \mathrm{g}$ per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at $1 / 10000$ dilution. Predicted band size : 31 kDa Blocking/Dilution buffer: 5\% NFDM/TBST.

## CDCA8 Antibody (Center) - Background

CDCA8 is a component of the chromosomal passenger complex (CPC) required for stability of the bipolar mitotic spindle. The CPC complex, a key regulator of mitosis, has essential functions at the centromere in ensuring correct chromosome alignment and segregation and is required for chromatin-induced microtubule stabilization and spindle assembly. In the complex, CDCA8 may be required to direct the CPC to centromeric DNA.
