

## ARHGEF1 Antibody (N-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP14869A

# **Specification**

## ARHGEF1 Antibody (N-term) - Product Information

Application WB,E
Primary Accession Q92888

Other Accession <u>NP\_945328.1</u>, <u>NP\_945353.1</u>, <u>NP\_004697.2</u>

Reactivity
Human
Host
Clonality
Polyclonal
Isotype
Calculated MW
Antigen Region
Human
Rabbit
Polyclonal
Rabbit IgG
102435
164-192

## ARHGEF1 Antibody (N-term) - Additional Information

#### **Gene ID 9138**

### **Other Names**

Rho guanine nucleotide exchange factor 1, 115 kDa guanine nucleotide exchange factor, p115-RhoGEF, p115RhoGEF, Sub15, ARHGEF1

### Target/Specificity

This ARHGEF1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 164-192 amino acids from the N-terminal region of human ARHGEF1.

### **Dilution**

WB~~1:1000

E~~Use at an assay dependent concentration.

#### **Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

#### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

ARHGEF1 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

# ARHGEF1 Antibody (N-term) - Protein Information

#### Name ARHGEF1

**Function** Seems to play a role in the regulation of RhoA GTPase by guanine nucleotide-binding alpha-12 (GNA12) and alpha-13 (GNA13) subunits (PubMed:9641915, PubMed:9641916). Acts as a GTPase-activating protein (GAP) for GNA12 and GNA13, and as guanine nucleotide exchange factor (GEF) for RhoA GTPase (PubMed:30521495, PubMed:8810315, PubMed:9641915, PubMed:9641916). Activated G alpha 13/GNA13 stimulates the RhoGEF activity through interaction with the RGS-like domain (PubMed:9641916). This GEF activity is inhibited by binding to activated GNA12 (PubMed:9641916). Mediates angiotensin-2-induced RhoA activation (PubMed:20098430). In lymphoid follicles, may trigger activation of GNA13 as part of S1PR2-dependent signaling pathway that leads to inhibition of germinal center (GC) B cell growth and migration outside the GC niche.

### **Cellular Location**

Cytoplasm. Membrane. Note=Translocated to the membrane by activated GNA13 or LPA stimulation

### **Tissue Location**

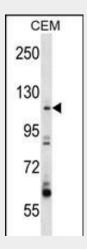

Ubiquitously expressed.

## ARHGEF1 Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## ARHGEF1 Antibody (N-term) - Images

ARHGEF1 Antibody (N-term) (Cat. #AP14869a) western blot analysis in CEM cell line lysates (35ug/lane). This demonstrates the ARHGEF1 antibody detected the ARHGEF1 protein (arrow).

### ARHGEF1 Antibody (N-term) - Background

Rho GTPases play a fundamental role in numerous cellular processes that are initiated by extracellular stimuli that work

through G protein coupled receptors. The encoded protein may form complex with G proteins and stimulate Rho-dependent signals. Multiple alternatively spliced transcript variants have been found for this gene, but the full-length nature of some variants has not been defined.
