

Connexin 43 Antibody (N-term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP1541b

Specification

Connexin 43 Antibody (N-term) - Product Information

Application	WB,E
Primary Accession	P17302
Other Accession	P16863 , P18246
Reactivity	Human, Mouse, Rat
Predicted Host	Bovine, Xenopus Rabbit
Clonality	Polyclonal
Isotype	Rabbit Ig
Antigen Region	107-138

Connexin 43 Antibody (N-term) - Additional Information

Gene ID 2697

Other Names

Gap junction alpha-1 protein, Connexin-43, Cx43, Gap junction 43 kDa heart protein, GJA1, GJAL

Target/Specificity

This Connexin 43 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 107-138 amino acids from the N-terminal region of human Connexin 43.

Dilution

WB~~1:1000

Format

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Connexin 43 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

Connexin 43 Antibody (N-term) - Protein Information

Western blot analysis of lysates from HeLa, U-87 MG, C6 cell line and mouse heart lysate (from left to right), using GJA1 Antibody (N121)(Cat. #AP1541b). AP1541b was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysates at 35ug per lane.

Connexin 43 Antibody (N-term) - Background

Gap junction protein, alpha 1 is a member of the connexin gene family and a component of gap junctions. Gap junctions are composed of arrays of intercellular channels and provide a route for the diffusion of materials of low molecular weight from cell to cell. Connexin 43 is the major protein of gap junctions in the heart, and gap junctions are thought to have a crucial role in the synchronized contraction of the heart and in embryonic development. Connexin 43 is targeted by several protein kinases that regulate myocardial cell-cell coupling. A related intron-less connexin 43 pseudogene, GJA1P, has been mapped to chromosome 5.

Name GJA1

Synonyms GJAL

Function

Gap junction protein that acts as a regulator of bladder capacity. A gap junction consists of a cluster of closely packed pairs of transmembrane channels, the connexons, through which materials of low MW diffuse from one cell to a neighboring cell. May play a critical role in the physiology of hearing by participating in the recycling of potassium to the cochlear endolymph. Negative regulator of bladder functional capacity: acts by enhancing intercellular electrical and chemical transmission, thus sensitizing bladder muscles to cholinergic neural stimuli and causing them to contract (By similarity). May play a role in cell growth inhibition through the regulation of NOV expression and localization. Plays an essential role in gap junction communication in the ventricles (By similarity).

Cellular Location

Cell membrane; Multi-pass membrane protein. Cell junction, gap junction. Endoplasmic reticulum {ECO:0000250|UniProtKB:P23242}. Note=Localizes at the intercalated disk (ICD) in cardiomyocytes and the proper localization at ICD is dependent on TMEM65. {ECO:0000250|UniProtKB:P23242}

Tissue Location

Expressed in the heart and fetal cochlea.
