Taste receptor type 2 member 7, T2R7, Taste receptor family B member 4, TRB4, TAS2R7

Target/Specificity

This TAS2R7 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 208-235 amino acids from the C-terminal region of human TAS2R7.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

TAS2R7 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

TAS2R7 Antibody (C-term) - Protein Information**Name** TAS2R7**Function** Gustducin-coupled receptor implicated in the perception of bitter compounds in the oral

cavity and the gastrointestinal tract. Signals through PLCB2 and the calcium-regulated cation channel TRPM5.

TAS2R7 Antibody (C-term) - Background

This gene product belongs to the family of candidate taste receptors that are members of the G-protein-coupled receptor superfamily. These proteins are specifically expressed in the taste receptor cells of the tongue and palate epithelia. They are organized in the genome in clusters and are genetically linked to loci that influence bitter perception in mice and humans. In functional expression studies, they respond to bitter tastants. This gene maps to the taste receptor gene cluster on chromosome 12p13.
