TRPC1 Antibody (C-term) - Additional Information**Gene ID** 7220**Other Names**

Short transient receptor potential channel 1, TrpC1, Transient receptor protein 1, TRP-1, TRPC1, TRP1

Target/Specificity

This TRPC1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 765-793 amino acids from the C-terminal region of human TRPC1.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

TRPC1 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

TRPC1 Antibody (C-term) - Protein Information**Name** TRPC1

Synonyms TRP1

Function Forms a receptor-activated non-selective calcium permeant cation channel. Probably is operated by a phosphatidylinositol second messenger system activated by receptor tyrosine kinases or G-protein coupled receptors. Also activated by intracellular calcium store depletion.

Cellular Location

Cell membrane; Multi-pass membrane protein

Tissue Location

Seems to be ubiquitous.

TRPC1 Antibody (C-term) - Background

TRPC1 belongs to the transient receptor potential (TRP) superfamily of cation channels. TRP cation channels are involved in diverse physiologic processes, including receptor- and store-operated Ca^{2+} entry, mineral absorption, and cell death. They also function as sensors for pain, heat, cold, sound, stretch, and osmotic changes (Zhang et al., 2009 [PubMed 19193631]).
