

MYRIP Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP17165B

Specification

MYRIP Antibody (C-term) - Product Information

Application WB,E **Primary Accession 08NFW9** Other Accession NP 056275.2 Reactivity Human Host **Rabbit** Clonality **Polyclonal** Isotype Rabbit IgG Calculated MW 95706 Antigen Region 659-686

MYRIP Antibody (C-term) - Additional Information

Gene ID 25924

Other Names

Rab effector MyRIP, Exophilin-8, Myosin-VIIa- and Rab-interacting protein, Synaptotagmin-like protein lacking C2 domains C, SlaC2-c, Slp homolog lacking C2 domains c, MYRIP, SLAC2C

Target/Specificity

This MYRIP antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 659-686 amino acids from the C-terminal region of human MYRIP.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

MYRIP Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

MYRIP Antibody (C-term) - Protein Information

Name MYRIP

Synonyms SLAC2C

Function Rab effector protein involved in melanosome transport. Serves as link between melanosome-bound RAB27A and the motor proteins MYO5A and MYO7A. May link RAB27A-containing vesicles to actin filaments. Functions as a protein kinase A-anchoring protein (AKAP). May act as a scaffolding protein that links PKA to components of the exocytosis machinery, thus facilitating exocytosis, including insulin release (By similarity).

Cellular Location

Cytoplasm {ECO:0000250|UniProtKB:Q8K3I4}. Cytoplasm, perinuclear region {ECO:0000250|UniProtKB:Q7TNY7} Cytoplasmic vesicle, secretory vesicle {ECO:0000250|UniProtKB:Q7TNY7} Note=In presynaptic and postsynaptic areas in photoreceptor cells and in the basal microvilli of retinal pigment epithelium cells. Associated with melanosomes. Colocalizes with actin filaments {ECO:0000250|UniProtKB:Q7TNY7}

Tissue Location

Detected in brain, skin, heart, adrenal medulla, pancreas, intestine, liver, kidney, muscle and testis

MYRIP Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

MYRIP Antibody (C-term) - Images

MYRIP Antibody (C-term) (Cat. #AP17165b) western blot analysis in K562 cell line lysates (35ug/lane). This demonstrates the MYRIP antibody detected the MYRIP protein (arrow).

MYRIP Antibody (C-term) - Background

Rab effector protein involved in melanosome transport. Serves as link between melanosome-bound RAB27A and the motor proteins MYO5A and MYO7A. May link RAB27A-containing vesicles to actin

filaments (By similarity).
