

LMBR1 Antibody (Center)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP17299c**Specification**

LMBR1 Antibody (Center) - Product Information

Application	WB,E
Primary Accession	O8WVP7
Other Accession	O9JIT0 , NP_071903.2
Reactivity	Human
Predicted	Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	55098
Antigen Region	262-290

LMBR1 Antibody (Center) - Additional Information**Gene ID** 64327**Other Names**

Limb region 1 protein homolog, Differentiation-related gene 14 protein, LMBR1, C7orf2, DIF14

Target/Specificity

This LMBR1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 262-290 amino acids from the Central region of human LMBR1.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

LMBR1 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

LMBR1 Antibody (Center) - Protein Information**Name** LMBR1**Synonyms** C7orf2, DIF14

Function Putative membrane receptor.

Cellular Location

Membrane; Multi-pass membrane protein

Tissue Location

Widely expressed with strongest expression in heart and pancreas.

LMBR1 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

LMBR1 Antibody (Center) - Images

LMBR1 Antibody (Center) (Cat. #AP17299c) western blot analysis in NCI-H292 cell line lysates (35ug/lane). This demonstrates the LMBR1 antibody detected the LMBR1 protein (arrow).

LMBR1 Antibody (Center) - Background

This gene encodes a member of the LMBR1-like membrane protein family. Another member of this protein family has been shown to be a lipocalin transmembrane receptor. A highly conserved, cis-acting regulatory module for the sonic hedgehog gene is located within an intron of this gene. Consequently, disruption of this genic region can alter sonic hedgehog expression and affect limb patterning, but it is not known if this gene functions directly in limb development. Mutations and chromosomal deletions and rearrangements in this genic region are associated with acheiropody and preaxial polydactyly, which likely result from altered sonic hedgehog expression.
