

**AKAP8L Antibody (C-term)**  
**Affinity Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP17416B****Specification**

---

**AKAP8L Antibody (C-term) - Product Information**

Application	WB,E
Primary Accession	<a href="#">O9ULX6</a>
Other Accession	<a href="#">O9R0L7</a> , <a href="#">NP_055186.2</a>
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	71640
Antigen Region	485-512

**AKAP8L Antibody (C-term) - Additional Information****Gene ID** 26993**Other Names**

A-kinase anchor protein 8-like, AKAP8-like protein, Helicase A-binding protein 95, HAP95, Homologous to AKAP95 protein, HA95, Neighbor of A-kinase-anchoring protein 95, Neighbor of AKAP95, AKAP8L, NAKAP, NAKAP95

**Target/Specificity**

This AKAP8L antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 485-512 amino acids from the C-terminal region of human AKAP8L.

**Dilution**

WB~~1:1000

E~~Use at an assay dependent concentration.

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

AKAP8L Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

**AKAP8L Antibody (C-term) - Protein Information****Name** AKAP8L

**Synonyms** NAKAP, NAKAP95

**Function** Could play a role in constitutive transport element (CTE)- mediated gene expression by association with DHX9. Increases CTE- dependent nuclear unspliced mRNA export (PubMed:[10748171](#), PubMed:[11402034](#)). Proposed to target PRKACA to the nucleus but does not seem to be implicated in the binding of regulatory subunit II of PKA (PubMed:[10761695](#), PubMed:[11884601](#)). May be involved in nuclear envelope breakdown and chromatin condensation. May be involved in anchoring nuclear membranes to chromatin in interphase and in releasing membranes from chromatin at mitosis (PubMed:[11034899](#)). May regulate the initiation phase of DNA replication when associated with TMPO isoform Beta (PubMed:[12538639](#)). Required for cell cycle G2/M transition and histone deacetylation during mitosis. In mitotic cells recruits HDAC3 to the vicinity of chromatin leading to deacetylation and subsequent phosphorylation at 'Ser-10' of histone H3; in this function seems to act redundantly with AKAP8 (PubMed:[16980585](#)). May be involved in regulation of pre-mRNA splicing (PubMed:[17594903](#)).

**Cellular Location**

Nucleus. Nucleus matrix. Nucleus speckle. Nucleus, PML body. Cytoplasm Note=Colocalizes with PRPF40A in the nuclear matrix (PubMed:16391387) Nuclear at steady state but shuttles between the nucleus and cytoplasm (PubMed:10748171). The shuttling property has been questioned (PubMed:11034899). Colocalizes with EBNA-LP in PML bodies (PubMed:11884601).

**Tissue Location**

Ubiquitously expressed. Expressed in the brain cortex (at protein level).

**AKAP8L Antibody (C-term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.
