

SPIRE1 Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP17465b**Specification**

SPIRE1 Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	Q08AE8
Other Accession	Q52KF3 , Q4R707 , NP_001122099.1 , NP_001122098.1
Reactivity	Human
Predicted	Monkey, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	85544
Antigen Region	665-691

SPIRE1 Antibody (C-term) - Additional Information**Gene ID** 56907**Other Names**

Protein spire homolog 1, Spir-1, SPIRE1 {ECO:0000312|EMBL:AAI252071}, KIAA1135, SPIR1

Target/Specificity

This SPIRE1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 665-691 amino acids from the C-terminal region of human SPIRE1.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

SPIRE1 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

SPIRE1 Antibody (C-term) - Protein Information**Name** SPIRE1 {ECO:0000312|EMBL:AAI25207.1}

Synonyms KIAA1135, SPIR1

Function Acts as an actin nucleation factor, remains associated with the slow-growing pointed end of the new filament (PubMed:[11747823](#), PubMed:[21620703](#)). Involved in intracellular vesicle transport along actin fibers, providing a novel link between actin cytoskeleton dynamics and intracellular transport (PubMed:[11747823](#)). Required for asymmetric spindle positioning and asymmetric cell division during meiosis (PubMed:[21620703](#)). Required for normal formation of the cleavage furrow and for polar body extrusion during female germ cell meiosis (PubMed:[21620703](#)). Also acts in the nucleus: together with FMN2, promotes assembly of nuclear actin filaments in response to DNA damage in order to facilitate movement of chromatin and repair factors after DNA damage (PubMed:[26287480](#)). In addition, promotes innate immune signaling downstream of dsRNA sensing (PubMed:[35148361](#)). Mechanistically, contributes to IRF3 phosphorylation and activation downstream of MAVS and upstream of TBK1 (PubMed:[35148361](#)).

Cellular Location

Cytoplasm, cytoskeleton. Cytoplasm, perinuclear region. Cell membrane; Peripheral membrane protein; Cytoplasmic side. Cytoplasmic vesicle membrane {ECO:0000250|UniProtKB:Q52KF3}; Peripheral membrane protein {ECO:0000250|UniProtKB:Q52KF3}; Cytoplasmic side {ECO:0000250|UniProtKB:Q52KF3}. Note=Detected at the cleavage furrow during asymmetric oocyte division and polar body extrusion (By similarity). Punctate spots in perinuclear region and cytoplasm, colocalized with Rab11 (By similarity). {ECO:0000250|UniProtKB:Q52KF3}

SPIRE1 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

SPIRE1 Antibody (C-term) - Images

SPIRE1 Antibody (C-term) (Cat. #AP17465b) western blot analysis in 293 cell line lysates (35ug/lane). This demonstrates the SPIRE1 antibody detected the SPIRE1 protein (arrow).

SPIRE1 Antibody (C-term) - Background

Spire proteins, such as SPIRE1, are highly conserved between species. They belong to the family of Wiskott-Aldrich homology region-2 (WH2) proteins, which are involved in actin organization (Kerkhoff et al., 2001 [PubMed 11747823]).[supplied by OMIM].
