

PCDHA10 Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP17477B

Specification

PCDHA10 Antibody (C-term) - Product Information

Application WB,E
Primary Accession O9Y512

Other Accession <u>NP_061724.1</u>, <u>NP_114065.1</u>

Reactivity

PCDHA10 Antibody (C-term) - Additional Information

Gene ID 56139

Other Names

Protocadherin alpha-10, PCDH-alpha-10, PCDHA10, CNRS8

Target/Specificity

This PCDHA10 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 771-798 amino acids from the C-terminal region of human PCDHA10.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

PCDHA10 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

PCDHA10 Antibody (C-term) - Protein Information

Name PCDHA10

Synonyms CNRS8

Function Potential calcium-dependent cell-adhesion protein. May be involved in the establishment and maintenance of specific neuronal connections in the brain.

Cellular Location

Cell membrane; Single-pass type I membrane protein

PCDHA10 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

PCDHA10 Antibody (C-term) - Images

PCDHA10 Antibody (C-term) (Cat. #AP17477b) western blot analysis in HL-60 cell line lysates (35ug/lane). This demonstrates the PCDHA10 antibody detected the PCDHA10 protein (arrow).

PCDHA10 Antibody (C-term) - Background

This gene is a member of the protocadherin alpha gene cluster, one of three related gene clusters tandemly linked on chromosome five that demonstrate an unusual genomic organization similar to that of B-cell and T-cell receptor gene clusters. The alpha gene cluster is composed of 15 cadherin superfamily genes related to the mouse CNR genes and consists of 13 highly similar and 2 more distantly related coding sequences. The tandem array of 15 N-terminal exons, or variable exons, are followed by downstream C-terminal exons, or constant exons, which are shared by all genes in the cluster. The large, uninterrupted N-terminal exons each encode six cadherin ectodomains while the C-terminal exons encode the cytoplasmic domain. These neural cadherin-like cell adhesion proteins are integral plasma membrane proteins that most likely play a critical role in the establishment and function of specific

cell-cell connections in the brain. Alternative splicing has been observed and additional variants have been suggested but their full-length nature has yet to be determined.
