

PPIL5 Antibody (Center)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP18105c

Specification

PPIL5 Antibody (Center) - Product Information

Application WB.E **Primary Accession** 096L50 Other Accession NP 689542.2 Reactivity Human Host **Rabbit** Clonality **Polyclonal** Isotype Rabbit IgG Calculated MW 46723 Antigen Region 127-153

PPIL5 Antibody (Center) - Additional Information

Gene ID 122769

Other Names

Leucine-rich repeat protein 1, 4-1BB-mediated-signaling molecule, 4-1BBlrr, LRR-repeat protein 1, LRR-1, Peptidylprolyl isomerase-like 5, LRR1, PPIL5

Target/Specificity

This PPIL5 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 127-153 amino acids from the Central region of human PPIL5.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

PPIL5 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

PPIL5 Antibody (Center) - Protein Information

Name LRR1 (HGNC:19742)

Synonyms PPIL5

Tel: 858.875.1900 Fax: 858.875.1999

Function Substrate recognition subunit of an ECS (Elongin BC-CUL2/5- SOCS-box protein) E3 ubiquitin-protein ligase complex which mediates the ubiquitination and subsequent proteasomal degradation of target proteins (PubMed:15601820). ECS(LRR1) ubiquitinates MCM7 and promotes CMG replisome disassembly by VCP and chromatin extraction during S- phase (By similarity). May negatively regulate the 4-1BB-mediated signaling cascades which result in the activation of NK-kappaB and JNK1 (PubMed: 11804328).

Cellular Location

Nucleus.

Tissue Location

Ubiquitous. Maximal expression was seen in the heart and skeletal muscle and minimal expression seen in the kidney

PPIL5 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

PPIL5 Antibody (Center) - Images

PPIL5 Antibody (Center) (Cat. #AP18105c) western blot analysis in HepG2 cell line lysates (35ug/lane). This demonstrates the PPIL5 antibody detected the PPIL5 protein (arrow).

PPIL5 Antibody (Center) - Background

The protein encoded by this gene contains a leucine-rich repeat (LRR). It specifically interacts with TNFRSF9/4-1BB, a member of the tumor necrosis factor receptor (TNFR) superfamily. Overexpression of this gene suppresses the activation of NF-kappa B induced by TNFRSF9 or TNF receptor-associated factor 2 (TRAF2), which suggests that this protein is a negative regulator of

TNFRSF9-mediated signaling cascades. At least three alternatively spliced transcript variants encoding distinct isoforms have been observed.
