

RNF31 Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP19285b**Specification**

RNF31 Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	O96EP0
Other Accession	NP_060469.4
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	119652
Antigen Region	955-983

RNF31 Antibody (C-term) - Additional Information**Gene ID** 55072**Other Names**

E3 ubiquitin-protein ligase RNF31, 632-, HOIL-1-interacting protein, HOIP, RING finger protein 31, Zinc in-between-RING-finger ubiquitin-associated domain protein, RNF31, ZIBRA

Target/Specificity

This RNF31 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 955-983 amino acids from the C-terminal region of human RNF31.

Dilution

WB~~1:2000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

RNF31 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

RNF31 Antibody (C-term) - Protein Information**Name** RNF31 ([HGNC:16031](#))

Function E3 ubiquitin-protein ligase component of the LUBAC complex which conjugates linear ('Met-1'-linked) polyubiquitin chains to substrates and plays a key role in NF-kappa-B activation and regulation of inflammation (PubMed:[17006537](#), PubMed:[19136968](#), PubMed:[20005846](#), PubMed:[21455173](#), PubMed:[21455180](#), PubMed:[21455181](#), PubMed:[22863777](#), PubMed:[28189684](#), PubMed:[28481331](#)). LUBAC conjugates linear polyubiquitin to IKBKG and RIPK1 and is involved in activation of the canonical NF-kappa-B and the JNK signaling pathways (PubMed:[17006537](#), PubMed:[19136968](#), PubMed:[20005846](#), PubMed:[21455173](#), PubMed:[21455180](#), PubMed:[21455181](#), PubMed:[22863777](#), PubMed:[28189684](#)). Linear ubiquitination mediated by the LUBAC complex interferes with TNF- induced cell death and thereby prevents inflammation (PubMed:[21455173](#), PubMed:[28189684](#)). LUBAC is recruited to the TNF-R1 signaling complex (TNF-RSC) following polyubiquitination of TNF-RSC components by BIRC2 and/or BIRC3 and to conjugate linear polyubiquitin to IKBKG and possibly other components contributing to the stability of the complex (PubMed:[20005846](#), PubMed:[27458237](#)). The LUBAC complex is also involved in innate immunity by conjugating linear polyubiquitin chains at the surface of bacteria invading the cytosol to form the ubiquitin coat surrounding bacteria (PubMed:[28481331](#), PubMed:[34012115](#)). LUBAC is not able to initiate formation of the bacterial ubiquitin coat, and can only promote formation of linear polyubiquitins on pre-existing ubiquitin (PubMed:[28481331](#)). Recruited to the surface of bacteria by RNF213, which initiates the bacterial ubiquitin coat (PubMed:[34012115](#)). The bacterial ubiquitin coat acts as an 'eat-me' signal for xenophagy and promotes NF-kappa-B activation (PubMed:[28481331](#), PubMed:[34012115](#)). Together with OTULIN, the LUBAC complex regulates the canonical Wnt signaling during angiogenesis (PubMed:[23708998](#)). RNF31 is required for linear ubiquitination of BCL10, thereby promoting TCR-induced NF-kappa- B activation (PubMed:[27777308](#)). Binds polyubiquitin of different linkage types (PubMed:[23708998](#)).

Cellular Location

Cytoplasm {ECO:0000250|UniProtKB:Q924T7}.

Tissue Location

Expressed in both normal and transformed breast epithelial cell lines.

RNF31 Antibody (C-term) - Background

The protein encoded by this gene contains a RING finger, a motif present in a variety of functionally distinct proteins and known to be involved in protein-DNA and protein-protein interactions.
