

MAPT Antibody (C-term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP20990c**Specification**

MAPT Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	P10636
Other Accession	P19332 , P10637 , P29172
Reactivity	Human, Mouse, Rat
Predicted	Bovine
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	78928

MAPT Antibody (C-term) - Additional Information**Gene ID** 4137**Other Names**

Microtubule-associated protein tau, Neurofibrillary tangle protein, Paired helical filament-tau, PHF-tau, MAPT, MAPTL, MTBT1, TAU

Target/Specificity

This MAPT antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 694-728 amino acids from the C-terminal region of human MAPT.

Dilution

WB~~1:500

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

MAPT Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

MAPT Antibody (C-term) - Protein Information**Name** MAPT ([HGNC:6893](#))

Synonyms MAPTL, MTBT1, TAU

Function Promotes microtubule assembly and stability, and might be involved in the establishment and maintenance of neuronal polarity (PubMed:[21985311](#)). The C-terminus binds axonal microtubules while the N-terminus binds neural plasma membrane components, suggesting that tau functions as a linker protein between both (PubMed:[21985311](#), PubMed:[32961270](#)). Axonal polarity is predetermined by TAU/MAPT localization (in the neuronal cell) in the domain of the cell body defined by the centrosome. The short isoforms allow plasticity of the cytoskeleton whereas the longer isoforms may preferentially play a role in its stabilization.

Cellular Location

Cytoplasm, cytosol. Cell membrane; Peripheral membrane protein; Cytoplasmic side. Cytoplasm, cytoskeleton. Cell projection, axon. Cell projection, dendrite. Secreted Note=Mostly found in the axons of neurons, in the cytosol and in association with plasma membrane components (PubMed:10747907). Can be secreted; the secretion is dependent on protein unfolding and facilitated by the cargo receptor TMED10; it results in protein translocation from the cytoplasm into the ERGIC (endoplasmic reticulum- Golgi intermediate compartment) followed by vesicle entry and secretion (PubMed:32272059).

Tissue Location

Expressed in neurons. Isoform PNS-tau is expressed in the peripheral nervous system while the others are expressed in the central nervous system

MAPT Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

MAPT Antibody (C-term) - Images

Western blot analysis of lysates from SH-SY5Y cell line, mouse brain, rat brain tissue lysate(from left to right), using MAPT Antibody (C-term)(Cat. #AP20990c). AP20990c was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody. Lysates at 20ug per lane.
