**USP2 Antibody (C-term L523)**
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP2131c

**Other Names**
Ubiquitin carboxyl-terminal hydrolase 2, 41 kDa ubiquitin-specific protease, Deubiquitinating enzyme 2, Ubiquitin thioesterase 2, Ubiquitin-specific-processing protease 2, USP2, UBP41

**Target/Specificity**
This USP2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 508-538 amino acids from the C-terminal region of human USP2.

**Dilution**
WB~1:2000
IHC-P~1:100

**Format**
Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

**Storage**
Maintain refrigerated at 2-8°C for up to 2 years.

---

Anti-USP2 Antibody (L314) at 1:2000 dilution + Hela whole cell lysate Lysates/proteins at 20 µg per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 68 kDa

Blocking/Dilution buffer: 5% NFDM/TBST.

Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been determined.
weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

USP2 Antibody (C-term L523) is for research use only and not for use in diagnostic or therapeutic procedures.

**USP2 Antibody (C-term L523) - Protein Information**

**Name** USP2

**Synonyms** UBP41

**Function**

Formalin-fixed and paraffin-embedded human testis tissue reacted with USP2 antibody (C-term L523), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

AP2131c staining USP2 in human kidney tissue sections by Immunohistochemistry (IHC-P - paraformaldehyde-fixed, paraffin-embedded sections). Tissue was fixed with formaldehyde and blocked with 3% BSA for 0.5 hour at room temperature; antigen retrieval was by heat mediation with a citrate buffer (pH6). Samples were incubated with primary antibody (1/100) for 1 hours at 37°C. A undiluted biotinylated goat polyvalent antibody was used as the secondary antibody.
similarity). Associates with clock proteins and deubiquitimates core clock component PER1 but does not affect its overall stability (By similarity). Regulates the nucleocyttoplasmic shuffling and nuclear retention of PER1 and its repressive role on the clock transcription factors CLOCK and ARNTL/BMAL1 (By similarity). Plays a role in the regulation of myogenic differentiation of embryonic muscle cells (By similarity).

**Cellular Location**

Cytoplasm

{ECO:0000250|UniProtKB:O88623}

Cytoplasm, perinuclear region

{ECO:0000250|UniProtKB:O88623}

Note=Localizes in the spermatid head in late-elongating spermatids in the thin area between the outer acrosomal membrane and the plasma membrane.

{ECO:0000250|UniProtKB:Q5U349}

**Tissue Location**

Expressed in mesangial cells of the kidney and in different types of glomerulonephritides (at protein level)

**USP2 Antibody (C-term L523) - Background**

USP2, an ubiquitin-specific protease, is selectively up regulated in bone by the osteotropic agents PTH, PThRP and PGE2 and possibly via the PKA/cAMP pathway. It is also thought to play a role in the recycling of ubiquitin by hydrolysis of branched poly-ubiquitin from linear poly-ubiquitin chains, production of free ubiquitin from linear poly-ubiquitin chains and from certain ribosomal ubiquitin fusion proteins.

**USP2 Antibody (C-term L523) - References**

**USP2 Antibody (C-term L523) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytometry
- Cell Culture
