

## **THBD Antibody (C-Term)**

Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP22243b

## **Specification**

## THBD Antibody (C-Term) - Product Information

**Application** WB, FC, E **Primary Accession** P07204 Other Accession O71U07 Reactivity Human Host **Rabbit** Clonality polyclonal Isotype Rabbit IgG Calculated MW 60329

## THBD Antibody (C-Term) - Additional Information

### **Gene ID 7056**

### **Other Names**

Thrombomodulin, TM, Fetomodulin, CD141, THBD, THRM

# **Target/Specificity**

This THBD antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 537-571 amino acids from human THBD.

#### **Dilution**

WB~~1:2000 FC~~1:25

## **Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

# **Precautions**

THBD Antibody (C-Term) is for research use only and not for use in diagnostic or therapeutic procedures.

## THBD Antibody (C-Term) - Protein Information

## **Name THBD**

### **Synonyms THRM**

Tel: 858.875.1900 Fax: 858.875.1999

Function Thrombomodulin is a specific endothelial cell receptor that forms a 1:1 stoichiometric complex with thrombin. This complex is responsible for the conversion of protein C to the activated protein C (protein Ca). Once evolved, protein Ca scissions the activated cofactors of the coagulation mechanism, factor Va and factor VIIIa, and thereby reduces the amount of thrombin generated.

#### **Cellular Location**

Membrane; Single-pass type I membrane protein.

### **Tissue Location**

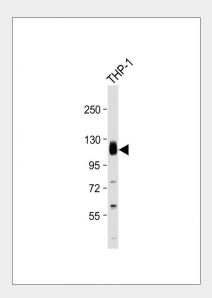

Endothelial cells are unique in synthesizing thrombomodulin

## **THBD Antibody (C-Term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

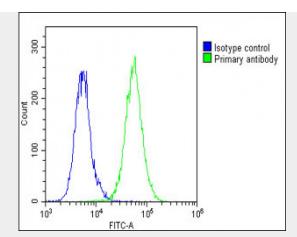

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## THBD Antibody (C-Term) - Images

Anti-THBD Antibody (C-Term) at 1:2000 dilution + THP-1 whole cell lysate Lysates/proteins at 20 μg per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size: 60 kDa Blocking/Dilution buffer: 5% NFDM/TBST.

Overlay histogram showing A549 cells stained with AP22243b(green line). The cells were fixed with 2% paraformaldehyde (10 min) and then permeabilized with 90% methanol for 10 min. The cells were then icubated in 2% bovine serum albumin to block non-specific protein-protein interactions followed by the antibody (AP22243b, 1:25 dilution) for 60 min at  $37^{\circ}$ C. The secondary antibody used was Goat-Anti-Rabbit IgG, DyLight® 488 Conjugated Highly Cross-Adsorbed(1583138) at 1/200 dilution for 40 min at  $37^{\circ}$ C. Isotype control antibody (blue line) was rabbit IgG1 (1µg/1x10^6 cells) used under the same conditions. Acquisition of >10, 000 events was performed.

## THBD Antibody (C-Term) - Background

Thrombomodulin is a specific endothelial cell receptor that forms a 1:1 stoichiometric complex with thrombin. This complex is responsible for the conversion of protein C to the activated protein C (protein Ca). Once evolved, protein Ca scissions the activated cofactors of the coagulation mechanism, factor Va and factor VIIIa, and thereby reduces the amount of thrombin generated.
