ART1 Antibody (N-term)

Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP2311a

Specification

ART1 Antibody (N-term) - Product Information

Application	**WB,E**
Primary Accession	P52961
Reactivity	**Human, Mouse**
Host	**Rabbit**
Clonality	**Polyclonal**
Isotype	**Rabbit IgG**
Calculated MW	**36335**
Antigen Region	**14-43**

ART1 Antibody (N-term) - Additional Information

Gene ID 417

Other Names
GPI-linked NAD(P)(+)--arginine ADP-ribosyltransferase 1, ADP-ribosyltransferase C2 and C3 toxin-like 1, ARTC1, Mono(ADP-ribosyl)transferase 1, CD296, ART1

Target/Specificity
This ART1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 14-43 amino acids from the N-terminal region of human ART1.

Dilution
WB~~1:1000
E~~Use at an assay dependent concentration.

Format
Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage
Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions
ART1 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

ART1 Antibody (N-term) - Protein Information

Name ART1

Function Has ADP-ribosyltransferase activity toward GLP1R.

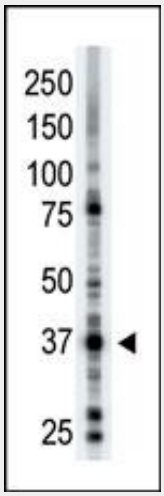
Cellular Location
Sarcoplasmic reticulum membrane; Lipid-anchor, GPI-anchor

ART1 Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

ART1 Antibody (N-term) - Images



The anti-ART1 Pab (Cat. #AP2311a) is used in Western blot to detect ART1 in mouse brain tissue lysate.

ART1 Antibody (N-term) - Background

ADP-ribosyltransferase catalyzes the ADP-ribosylation of arginine residues in proteins. Mono-ADP-ribosylation is a posttranslational modification of proteins that is interfered with by a variety of bacterial toxins including cholera, pertussis, and heat-labile enterotoxins of E. coli. The amino acid sequence of ART1 consists of predominantly hydrophobic N- and C-terminal regions, which is characteristic of glycosylphosphatidylinositol (GPI)-anchored proteins.
