

**Vimentin Antibody (C-term)**  
**Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP2739B****Specification**

---

**Vimentin Antibody (C-term) - Product Information**

Application	IHC-P, FC, WB, IF,E
Primary Accession	<a href="#">P08670</a>
Other Accession	<a href="#">P31000</a> , <a href="#">P02543</a> , <a href="#">P20152</a> , <a href="#">Q4R4X4</a> , <a href="#">P48670</a> , <a href="#">P09654</a> , <a href="#">P48616</a> , <a href="#">P24790</a>
Reactivity	Human
Predicted	Xenopus, Bovine, Chicken, Hamster, Monkey, Mouse, Pig, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	430-457

**Vimentin Antibody (C-term) - Additional Information****Gene ID** 7431**Other Names**  
Vimentin, VIM**Target/Specificity**

This Vimentin antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 430-457 amino acids from the C-terminal region of human Vimentin.

**Dilution**

IHC-P~~1:10~50  
FC~~1:10~50  
WB~~1:1000  
IF~~1:100  
E~~Use at an assay dependent concentration.

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Vimentin Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

**Vimentin Antibody (C-term) - Protein Information**

**Name** VIM ([HGNC:12692](#))

**Function** Vimentins are class-III intermediate filaments found in various non-epithelial cells, especially mesenchymal cells. Vimentin is attached to the nucleus, endoplasmic reticulum, and mitochondria, either laterally or terminally. Plays a role in cell directional movement, orientation, cell sheet organization and Golgi complex polarization at the cell migration front (By similarity). Protects SCRIB from proteasomal degradation and facilitates its localization to intermediate filaments in a cell contact-mediated manner (By similarity).

**Cellular Location**

Cytoplasm. Cytoplasm, cytoskeleton. Nucleus matrix {ECO:0000250|UniProtKB:P31000}. Cell membrane {ECO:0000250|UniProtKB:P20152}

**Tissue Location**

Highly expressed in fibroblasts, some expression in T- and B-lymphocytes, and little or no expression in Burkitt's lymphoma cell lines. Expressed in many hormone-independent mammary carcinoma cell lines.

**Vimentin Antibody (C-term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**Vimentin Antibody (C-term) - Images**

Fluorescent confocal image of SY5Y cells stained with Vimentin (C-term) antibody. SY5Y cells were fixed with 4% PFA (20 min), permeabilized with Triton X-100 (0.2%, 30 min). Cells were then incubated with AP2739b Vimentin (C-term) primary antibody (1:100, 2 h at room temperature).

For secondary antibody, Alexa Fluor® 488 conjugated donkey anti-rabbit antibody (green) was used (1:1000, 1h). Nuclei were counterstained with Hoechst 33342 (blue) (10 µg/ml, 5 min). Note the highly specific localization of the Vimentin immunosignal to the cytoskeleton, supported by Human Protein Atlas Data (<http://www.proteinatlas.org/ENSG00000026025>).

Western blot analysis of Vimentin antibody (C-term) (Cat.#AP2739b) in NCI-H460 cell line lysates (35ug/lane). Vimentin (arrow) was detected using the purified Pab .

Anti-Vimentin Antibody (C-term) at 1:1000 dilution + U-2OS whole cell lysate Lysates/proteins at 20 µg per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 54 kDa Blocking/Dilution buffer: 5% NFDM/TBST.

Vimentin Antibody (C-term) (Cat. #AP2739b) immunohistochemistry analysis in formalin fixed and paraffin embedded human colon tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of Vimentin Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

Vimentin Antibody (C-term) (Cat. #AP2739b) flow cytometric analysis of Hela cells (right histogram) compared to a negative control cell (left histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

### Vimentin Antibody (C-term) - Background

Along with the microfilaments (actins) and microtubules (tubulins), the intermediate filaments represent a third class of well-characterized cytoskeletal elements. The subunits display a tissue-specific pattern of expression. Desmin is the subunit specific for muscle and vimentin the subunit specific for mesenchymal tissue.
