FZD1 Antibody (C-term)

Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP2755B

Specification

FZD1 Antibody (C-term) - Product Information

Application	**WB,E**
Primary Accession	Q9UP38
Other Accession	Q61090, O75084, O57329, Q8AVJ9, Q9PUK8, Q9I9M5, Q08463, O70421, O57328
Reactivity	**Human**
Predicted	**Chicken, Mouse, Rat, Xenopus**
Host	**Rabbit**
Clonality	**Polyclonal**
Isotype	**Rabbit IgG**
Antigen Region	**504-533**

FZD1 Antibody (C-term) - Additional Information

Gene ID 8321

Other Names
Frizzled-1, Fz-1, hFz1, FzE1, FZD1

Target/Specificity
This FZD1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 504-533 amino acids from the C-terminal region of human FZD1.

Dilution
WB~~1:1000
E~~Use at an assay dependent concentration.

Format
Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage
Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions
FZD1 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

FZD1 Antibody (C-term) - Protein Information

Name FZD1

Function Receptor for Wnt proteins (PubMed:10557084). Activated by WNT3A, WNT3, WNT1 and to a lesser extent WNT2, but apparently not by WNT4, WNT5A, WNT5B, WNT6, WNT7A or WNT7B (PubMed:10557084). Contradictory results showing activation by WNT7B have been described for mouse (By similarity). Functions in the canonical Wnt/beta-catenin signaling pathway (PubMed:10557084). The canonical Wnt/beta-catenin signaling pathway leads to the activation of disheveled proteins, inhibition of GSK-3 kinase, nuclear accumulation of beta-catenin and activation of Wnt target genes (PubMed:10557084). A second signaling pathway involving PKC and calcium fluxes has been seen for some family members, but it is not yet clear if it represents a distinct pathway or if it can be integrated in the canonical pathway, as PKC seems to be required for Wnt-mediated inactivation of GSK-3 kinase. Both pathways seem to involve interactions with G-proteins. May be involved in transduction and intercellular transmission of polarity information during tissue morphogenesis and/or in differentiated tissues (Probable).

Cellular Location
Cell membrane; Multi-pass membrane protein

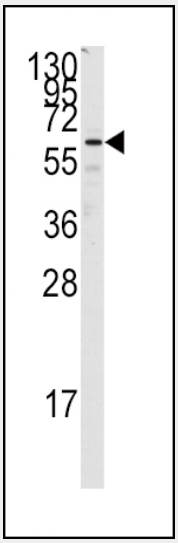
Tissue Location
Expressed in adult heart, placenta, lung, kidney, pancreas, prostate, and ovary and in fetal lung and kidney

FZD1 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

FZD1 Antibody (C-term) - Images



Western blot analysis of anti-FZD1 Antibody (C-term) (Cat.#AP2755b) in Jurkat cell line lysates (35ug/lane).FZD1(arrow) was detected using the purified Pab.

FZD1 Antibody (C-term) - Background

Members of the 'frizzled' proten family are 7-transmembrane domain proteins that are receptors for Wnt signaling proteins. The FZD1 protein contains a signal peptide, a cysteine-rich domain in the N-terminal extracellular region, 7 transmembrane domains, and a C-terminal PDZ domain-binding motif.The FZD1 transcript is expressed in various tissues.
