

**Phospho-RUNX2(S465) Antibody**  
**Affinity Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP3559a**

**Specification**

---

**Phospho-RUNX2(S465) Antibody - Product Information**

Application	DB,E
Primary Accession	<a href="#">Q13950</a>
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit Ig

**Phospho-RUNX2(S465) Antibody - Additional Information**

**Gene ID** 860

**Other Names**

Runt-related transcription factor 2, Acute myeloid leukemia 3 protein, Core-binding factor subunit alpha-1, CBF-alpha-1, Oncogene AML-3, Osteoblast-specific transcription factor 2, OSF-2, Polyomavirus enhancer-binding protein 2 alpha A subunit, PEA2-alpha A, PEBP2-alpha A, SL3-3 enhancer factor 1 alpha A subunit, SL3/AKV core-binding factor alpha A subunit, RUNX2, AML3, CBFA1, OSF2, PEBP2A

**Target/Specificity**

This RUNX2 Antibody is generated from rabbits immunized with a KLH conjugated synthetic phosphopeptide corresponding to amino acid residues surrounding S465 of human RUNX2.

**Dilution**

DB~~1:500

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Phospho-RUNX2(S465) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Phospho-RUNX2(S465) Antibody - Protein Information**

**Name** RUNX2

**Synonyms** AML3, CBFA1, OSF2, PEBP2A

**Function** Transcription factor involved in osteoblastic differentiation and skeletal morphogenesis (PubMed:[28505335](#), PubMed:[28738062](#), PubMed:[28703881](#)). Essential for the maturation of osteoblasts and both intramembranous and endochondral ossification. CBF binds to the core site, 5'-PYGPYGGT-3', of a number of enhancers and promoters, including murine leukemia virus, polyomavirus enhancer, T-cell receptor enhancers, osteocalcin, osteopontin, bone sialoprotein, alpha 1(I) collagen, LCK, IL-3 and GM-CSF promoters. In osteoblasts, supports transcription activation: synergizes with SPEN/MINT to enhance FGFR2- mediated activation of the osteocalcin FGF-responsive element (OCFRE) (By similarity). Inhibits KAT6B-dependent transcriptional activation.

#### **Cellular Location**

Nucleus

#### **Tissue Location**

Specifically expressed in osteoblasts.

### **Phospho-RUNX2(S465) Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

### **Phospho-RUNX2(S465) Antibody - Images**

Dot blot analysis of anti-Phospho-RUNX2-pS465 Antibody (Cat.#AP3559a) on nitrocellulose membrane. 50ng of Phospho-peptide or Non Phospho-peptide per dot were adsorbed. Antibody working concentrations are 0.5ug per ml.

### **Phospho-RUNX2(S465) Antibody - Background**

Runx2 is a member of the RUNX family of transcription factors. It is a nuclear protein with an Runt DNA-binding domain. This protein is essential for osteoblastic differentiation and skeletal morphogenesis and acts as a scaffold for nucleic acids and regulatory factors involved in skeletal gene expression. It can bind DNA both as a monomer or, with more affinity, as a subunit of a heterodimeric complex. Mutations in the Runx2 gene have been associated with the bone development disorder cleidocranial dysplasia (CCD).
