

### Phospho-mouse BAD(S161) Antibody

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP3777c

### Specification

# Phospho-mouse BAD(S161) Antibody - Product Information

Application Primary Accession Other Accession Reactivity Predicted Host Clonality Isotype Calculated MW DB,E <u>Q61337</u> <u>Q35147</u>, <u>NP\_031548.1</u> Mouse Rat Rabbit Polyclonal Rabbit IgG 22080

## Phospho-mouse BAD(S161) Antibody - Additional Information

### Gene ID 12015

#### **Other Names**

Bcl2-associated agonist of cell death, BAD, Bcl-2-binding component 6, Bcl-xL/Bcl-2-associated death promoter, Bcl2 antagonist of cell death, Bad, Bbc6

#### Target/Specificity

This mouse BAD Antibody is generated from rabbits immunized with a KLH conjugated synthetic phosphopeptide corresponding to amino acid residues surrounding S161 of mouse BAD.

Dilution

DB~~1:500

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### Precautions

Phospho-mouse BAD(S161) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

### Phospho-mouse BAD(S161) Antibody - Protein Information

Name Bad

# Synonyms Bbc6

**Function** Promotes cell death. Successfully competes for the binding to Bcl-X(L), Bcl-2 and Bcl-W, thereby affecting the level of heterodimerization of these proteins with BAX. Can reverse the death repressor activity of Bcl-X(L), but not that of Bcl-2. Appears to act as a link between growth factor receptor signaling and the apoptotic pathways.

#### **Cellular Location**

Mitochondrion outer membrane. Cytoplasm. Note=Colocalizes with HIF3A isoform 2 in the cytoplasm (PubMed:21546903). Upon phosphorylation, locates to the cytoplasm.

## Phospho-mouse BAD(S161) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

Phospho-mouse BAD(S161) Antibody - Images

Dot blot analysis of Phospho-mouse BAD-S161 Antibody Phospho-specific Pab (Cat. #AP3777c) on nitrocellulose membrane. 50ng of Phospho-peptide or Non Phospho-peptide per dot were adsorbed. Antibody working concentrations are 0.6ug per ml.

### Phospho-mouse BAD(S161) Antibody - Background

BAD promotes cell death. Successfully competes for the binding to Bcl-X(L), Bcl-2 and Bcl-W, thereby affecting the level of heterodimerization of these proteins with BAX. Can reverse the death repressor activity of Bcl-X(L), but not that of Bcl-2. Appears to act as a link between growth factor receptor signaling and the apoptotic pathways.
