LPPR4 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

# LPPR4 Antibody (C-term) - Protein Information

## Name PLPPR4 (HGNC:23496)

**Function** Postsynaptic density membrane protein that indirectly regulates glutamatergic synaptic transmission through lysophosphatidic acid (LPA)-mediated signaling pathways. Binds lysophosphatidic acid (LPA) and mediates its internalization into cells. Could act as receptor or a transporter of this lipid at the post-synaptic membrane (By similarity). Modulates lysophosphatidic acid (LPA) activity in neuron axonal outgrowth during development by attenuating phospholipid-induced axon collapse (By similarity).

**Cellular Location** Postsynaptic density membrane; Multi-pass membrane protein

**Tissue Location** Expressed by glutamatergic neurons (at protein level).

# LPPR4 Antibody (C-term) - Background

LPPR4 belongs to the lipid phosphate phosphatase (LPP) family. LPPs catalyze the dephosphorylation of a number of bioactive lipid mediators that regulate a variety of cell functions. This protein is specifically expressed in neurons. It is located in the membranes of outgrowing axons and has been shown to be important for axonal outgrowth during development and regenerative sprouting.
