NSE Antibody - Protein Information**Name** ENO2**Function**

Has neurotrophic and neuroprotective properties on a broad spectrum of central nervous system (CNS) neurons. Binds, in a calcium- dependent manner, to cultured neocortical neurons and promotes cell survival (By similarity).

Cellular Location

Cytoplasm. Cell membrane. Note=Can translocate to the plasma membrane in either the homodimeric (alpha/alpha) or heterodimeric (alpha/gamma) form

Tissue Location

The alpha/alpha homodimer is expressed in embryo and in most adult tissues. The alpha/beta heterodimer and the beta/beta homodimer are found in striated muscle, and the alpha/gamma heterodimer and the gamma/gamma homodimer in neurons

NSE Antibody - Images

Immunofluorescence analysis of A549 cells, using NSE antibody .

Western blot analysis of lysates from U-87 MG, SH-SY5Y cell line (from left to right), using NSE Antibody (C0280). C0280 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L (HRP) at 1:5000 dilution was used as the secondary antibody. Lysates at 35 µg per lane.

Western blot analysis of extracts from HeLa cells (Lane 1), colo cells (Lane 2), HepG2 cells (Lane 3) and 293 cells (Lane 4), using NSE Antibody. The lane on the left is treated with synthesized peptide.

Immunohistochemical analysis of paraffin-embedded human brain tissue using NSE antibody .
