CLIC3 Antibody - Protein Information**Name** CLIC3**Function**

Can insert into membranes and form chloride ion channels. May participate in cellular growth control.

Cellular Location

Nucleus. Membrane; Single-pass membrane protein. Cytoplasm. Note=Predominantly nuclear. Some protein was found in the cytoplasm. Exists both as soluble cytoplasmic protein and as membrane protein with probably a single transmembrane domain (By similarity)

Tissue Location

Detected in placenta (at protein level). Widely expressed. High expression is found in placenta followed by lung and heart. Low expression in skeletal muscle, kidney and pancreas
