ELF5 Antibody - Protein Information**Name** ELF5**Synonyms** ESE2**Function**

Transcriptionally activator that may play a role in regulating the later stages of keratinocytes terminal differentiation.

Cellular Location

Nucleus {ECO:0000255|PROSITE-ProRule:PRU00237}.

Tissue Location

Expressed exclusively in tissues with a high content of epithelial cells. Highly expressed in salivary

gland, mammary gland, kidney and prostate. Weakly expressed in placenta and lung. Isoform 1 and isoform 2 are differentially expressed in different tissues. In the kidney, only isoform 1 was expressed, while prostate expressed both isoforms, with levels of isoform 2 being higher. Expression is up-regulated during keratinocyte differentiation. Several epithelial carcinoma cell lines showed lack of expression.
