Rabbit Anti-GLP-1R Polyclonal Antibody - Protein Information**Name** Glp1r**Function**

G-protein coupled receptor for glucagon-like peptide 1 (GLP- 1) (PubMed:9568699). Ligand binding triggers activation of a signaling cascade that leads to the activation of adenylyl cyclase and increased intracellular cAMP levels (By similarity). Plays a role in regulating insulin secretion in response to GLP-1 (PubMed:9568699).

Cellular Location

Cell membrane; Multi-pass membrane protein {ECO:0000250|UniProtKB:P43220}

Tissue Location

Detected in pancreatic islets (at protein level). Detected in pancreatic islets and lungs.

Rabbit Anti-GLP-1R Polyclonal Antibody - Background

This is a receptor for glucagon-like peptide 1. The activity of this receptor is mediated by G proteins which activate adenylyl cyclase.
