

Rabbit Anti-CD68 Polyclonal Antibody

Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP52189

Specification

Rabbit Anti-CD68 Polyclonal Antibody - Product Information

Application IHC-P, IF, E
Primary Accession P31996
Reactivity Mouse, Rat
Host Rabbit
Clonality Polyclonal
Calculated MW 37 KDa

Calculated MW 37 KDa
Physical State Liquid
Immunogen Recom

Immunogen Recombinant human CD68 protein Epitope Specificity 22-319/354

Isotype IgG
Purity

Buffer 0.01M TBS (pH7.4) with 1% BSA, 0.02%

Proclin300 and 50% Glycerol.

SUBCELLULAR LOCATION Isoform Short: Cell membrane; Single-pass

type I membrane protein. Isoform Long: Endosome membrane; Single-pass type I membrane protein. Lysosome membrane; Single-pass type I membrane protein.

SIMILARITY Belongs to the LAMP family.

Post-translational modifications N- and O-glycosylated

Important Note

This product as supplied is intended for research use only, not for use in human,

therapeutic or diagnostic applications.

Background Descriptions

affinity purified by Protein A

This gene encodes a 110-kD transmembrane glycoprotein that is highly expressed by human monocytes and tissue macrophages. It is a member of the lysosomal/endosomal-associated membrane glycoprotein (LAMP) family. The protein primarily localizes to lysosomes and endosomes with a smaller fraction circulating to the cell surface. It is a type I integral membrane protein with a heavily glycosylated extracellular domain and binds to tissue- and organ-specific lectins or selectins. The protein is also a member of the scavenger receptor family. Scavenger receptors typically function to clear cellular debris, promote phagocytosis, and mediate the recruitment and activation of macrophages. Alternative splicing results in multiple transcripts encoding different isoforms. [provided by RefSeq, Jul 2008]

Rabbit Anti-CD68 Polyclonal Antibody - Additional Information

Gene ID 12514

Other Names

Lamp4; gp11; Scard1; Macrosialin; CD68

Target/Specificity

Highly expressed by blood monocytes and tissue macrophages. Also expressed in lymphocytes, fibroblasts and endothelial cells. Expressed in many tumor cell lines which could allow them to attach to selectins on vascular endothelium, facilitating their dissemination to secondary sites.

Dilution

IHC-P~~1:100~1:500<br \> IF~~1:100~1:200<br \> E~~N/A

Storage

Store at -20 °C for one year. Avoid repeated freeze/thaw cycles. When reconstituted in sterile pH 7.4 0.01M PBS or diluent of antibody the antibody is stable for at least two weeks at 2-4 °C.

Rabbit Anti-CD68 Polyclonal Antibody - Protein Information

Name Cd68

Function

Could play a role in phagocytic activities of tissue macrophages, both in intracellular lysosomal metabolism and extracellular cell-cell and cell-pathogen interactions. Binds to tissue- and organ-specific lectins or selectins, allowing homing of macrophage subsets to particular sites. Rapid recirculation of CD68 from endosomes and lysosomes to the plasma membrane may allow macrophages to crawl over selectin-bearing substrates or other cells.

Cellular Location

[Isoform Long]: Endosome membrane; Single-pass type I membrane protein. Lysosome membrane; Single-pass type I membrane protein

Tissue Location

Expressed in tissue macrophages and to a lesser extent in dendritic cells

Rabbit Anti-CD68 Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
