Buffer	0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol.
SUBCELLULAR LOCATION	Cytoplasm. Cytoplasm, perinuclear region. Nucleus. Cell projection, ruffle membrane. Note=Co-localizes with PRKCZ in the perinuclear region.
SIMILARITY	Belongs to the WWC family. KIBRA subfamily. Contains 1 C2 domain. Contains 2 WW domains.
SUBUNIT	Homodimer. Interacts with DDN. Interacts with DYNLL1 and histone H3. The interaction with DYNLL1 is mandatory for the recruitment and transactivation functions of ESR1 or DYNLL1 to the target chromatin and the interaction with histone H3 ensures proper regulatory interaction of WWC1-DYNLL1-ESR1 complexes with target chromatin. Interacts (via WW domains) with DDR1 (via PPxY motif) in a collagen-regulated manner. Interacts with PRKCZ (via the protein kinase domain). Forms a tripartite complex with DDR1 and PRKCZ, but predominantly in the absence of collagen. Interacts (via the ADDV motif) with INADL (via PDZ domain 8). Interacts (via WW domains) with SYNPO (via PPxY motifs). Interacts with NF2 and SNX4.
Important Note	This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.

**Background Descriptions**

KIBRA is a 1,113 amino acid protein that localizes to the cytoplasm and contains one C2 domain and two WW domains. Expressed in colon, brain, kidney and heart tissue, KIBRA is thought to interact with dendrin and, via this interaction, may play a role in collagen-induced signaling. Additionally, KIBRA, which exists as multiple alternatively spliced isoforms, is involved in memory performance and in the pathogenesis of Alzheimer's disease. The gene encoding KIBRA maps to human chromosome 5, which contains 181 million base pairs and comprises nearly 6% of the human genome. Deletion of the p arm of chromosome 5 leads to Cri du chat syndrome, while deletion of the q arm or of chromosome 5 altogether is common in therapy-related acute myelogenous leukemias and myelodysplastic syndrome.

## **KIBRA Polyclonal Antibody - Additional Information**

### **Other Names**

Protein KIBRA, HBeAg-binding protein 3, Kidney and brain protein, KIBRA, WW domain-containing protein 1, WWC1, KIAA0869

### **Target/Specificity**

Expressed in mammary epithelial cells and breast cancer cell lines. Found in the luminal epithelium surrounding the ducts in the normal breast. In the brain, expressed in somatodendritic compartment of neurons in the cortex and hippocampus and in the cerebellum it is found in the Purkinje cells and some granule cells (at protein level). Detected in brain, heart, colon and kidney. In the kidney, expressed in glomerular podocytes, in some tubules and in the collecting duct.

## **KIBRA Polyclonal Antibody - Protein Information**

**Name** WWC1 ([HGNC:29435](#))

**Synonyms** KIAA0869, KIBRA

### **Function**

Regulator of the Hippo signaling pathway, also known as the Salvador-Warts-Hippo (SWH) pathway (PubMed:<a href="http://www.uniprot.org/citations/24682284" target="\_blank">24682284</a>). Enhances phosphorylation of LATS1 and YAP1 and negatively regulates cell proliferation and organ growth due to a suppression of the transcriptional activity of YAP1, the major effector of the Hippo pathway (PubMed:<a href="http://www.uniprot.org/citations/24682284" target="\_blank">24682284</a>). Along with NF2 can synergistically induce the phosphorylation of LATS1 and LATS2 and function in the regulation of Hippo signaling pathway (PubMed:<a href="http://www.uniprot.org/citations/20159598" target="\_blank">20159598</a>). Acts as a transcriptional coactivator of ESR1 which plays an essential role in DYNLL1-mediated ESR1 transactivation (PubMed:<a href="http://www.uniprot.org/citations/16684779" target="\_blank">16684779</a>).

target="\_blank">16684779</a>). Regulates collagen-stimulated activation of the ERK/MAPK cascade (PubMed:<a href="http://www.uniprot.org/citations/18190796" target="\_blank">18190796</a>). Modulates directional migration of podocytes (PubMed:<a href="http://www.uniprot.org/citations/18596123" target="\_blank">18596123</a>). Plays a role in cognition and memory performance (PubMed:<a href="http://www.uniprot.org/citations/18672031" target="\_blank">18672031</a>). Plays an important role in regulating AMPA-selective glutamate receptors (AMPA) trafficking underlying synaptic plasticity and learning (By similarity).
