## **LIPT1** Polyclonal Antibody - Protein Information

# Name LIPT1 (HGNC:29569)

## **Function**

Lipoyl amidotransferase that catalyzes the transfer of lipoyl moieties from lipoyl-protein H of the glycine cleavage system (lipoyl- GCSH) to E2 subunits of the pyruvate dehydrogenase complex (PDCE2) (PubMed:<a href="http://www.uniprot.org/citations/29987032"

target="\_blank">29987032</a>). Unable to catalyze the transfer of octanoyl from octanoyl-GCSH to PDCE2 (PubMed:<a href="http://www.uniprot.org/citations/29987032"

target="\_blank">29987032</a>). In vitro, it is also able to catalyze the transfer of the lipoyl group from lipoyl-AMP to the specific lysine residue of lipoyl domains of lipoate-dependent enzymes but this reaction may not be physiologically relevant (Probable).

## **Cellular Location**

Mitochondrion {ECO:0000250|UniProtKB:O46419}.

# **Tissue Location**

Highly expressed in skeletal muscle and heart, moderately in kidney and pancreas, and detected at lower levels in liver, brain, placenta and lung.
