Target/Specificity

This GAL antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 73-101 amino acids from the C-terminal region of human GAL.

Dilution

FC~~1:10~50

WB~~1:1000

IF~~1:10~50

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

GAL Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

GAL Antibody (C-term) - Protein Information**Name** GAL

Synonyms GAL1, GALN, GLNN

Function Endocrine hormone of the central and peripheral nervous systems that binds and activates the G protein-coupled receptors GALR1, GALR2, and GALR3. This small neuropeptide may regulate diverse physiologic functions including contraction of smooth muscle of the gastrointestinal and genitourinary tract, growth hormone and insulin release and adrenal secretion.

GAL Antibody (C-term) - Background

Galanin is small neuropeptide that functions as a cellular messenger within the central and peripheral nervous systems, modulating diverse physiologic functions (Mechenthaler, 2008 [PubMed 18500643]).
