

## **CCL5/RANTES Polyclonal Antibody**

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP57808

## **Specification**

## CCL5/RANTES Polyclonal Antibody - Product Information

Application IHC-P, IHC-F, IF, ICC, E Primary Accession P13501

Reactivity Rat, Pig, Bovine

Host Rabbit
Clonality Polyclonal
Calculated MW 9990

### CCL5/RANTES Polyclonal Antibody - Additional Information

#### **Gene ID 6352**

### **Other Names**

C-C motif chemokine 5, EoCP, Eosinophil chemotactic cytokine, SIS-delta, Small-inducible cytokine A5, T cell-specific protein P228, TCP228, T-cell-specific protein RANTES, RANTES(3-68), RANTES(4-68), CCL5, D17S136E, SCYA5

## **Dilution**

<span class ="dilution\_IHC-P">IHC-P~~N/A</span><br \> <span class
="dilution\_IHC-F">IHC-F~~N/A</span><br \> <span class
="dilution\_IF">IF~~1:50~200</span><br \> <span class ="dilution\_ICC">ICC~~N/A</span><br \> <span class = "dilution\_E">E~~N/A</span>

### **Format**

0.01M TBS(pH7.4), 0.09% (W/V) sodium azide and 50% Glyce

# **Storage**

Store at -20 °C for one year. Avoid repeated freeze/thaw cycles. When reconstituted in sterile pH 7.4 0.01M PBS or diluent of antibody the antibody is stable for at least two weeks at 2-4 °C.

# **CCL5/RANTES Polyclonal Antibody - Protein Information**

### Name CCL5

Synonyms D17S136E, SCYA5

### **Function**

Chemoattractant for blood monocytes, memory T-helper cells and eosinophils. Causes the release of histamine from basophils and activates eosinophils. May activate several chemokine receptors including CCR1, CCR3, CCR4 and CCR5. One of the major HIV-suppressive factors produced by CD8+ T-cells. Recombinant RANTES protein induces a dose-dependent inhibition of different strains of HIV-1, HIV-2, and simian immunodeficiency virus (SIV). The processed form RANTES(3-68) acts as a natural chemotaxis inhibitor and is a more potent inhibitor of

HIV-1-infection. The second processed form RANTES(4-68) exhibits reduced chemotactic and HIV-suppressive activity compared with RANTES(1-68) and RANTES(3-68) (PubMed:<a href="http://www.uniprot.org/citations/1380064" target="\_blank">1380064</a>, PubMed:<a href="http://www.uniprot.org/citations/15923218" target="\_blank">15923218</a>, PubMed:<a href="http://www.uniprot.org/citations/16791620" target="\_blank">16791620</a>, PubMed:<a href="http://www.uniprot.org/citations/8525373" target="\_blank">8525373</a>, PubMed:<a href="http://www.uniprot.org/citations/9516414" target="\_blank">9516414</a>). May also be an agonist of the G protein-coupled receptor GPR75, stimulating inositol trisphosphate production and calcium mobilization through its activation. Together with GPR75, may play a role in neuron survival through activation of a downstream signaling pathway involving the PI3, Akt and MAP kinases. By activating GPR75 may also play a role in insulin secretion by islet cells (PubMed:<a href="http://www.uniprot.org/citations/23979485" target="blank">23979485</a>).

Cellular Location Secreted.

#### **Tissue Location**

Expressed in the follicular fluid (at protein level). T-cell and macrophage specific.

# **CCL5/RANTES Polyclonal Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

## **CCL5/RANTES Polyclonal Antibody - Images**

Paraformaldehyde-fixed, paraffin embedded (Rat stomach); Antigen retrieval by boiling in sodium citrate buffer (pH6.0) for 15min; Block endogenous peroxidase by 3% hydrogen peroxide for 20 minutes; Blocking buffer (normal goat serum) at 37°C for 30min; Antibody incubation with (CCL5/RANTES) Polyclonal Antibody, Unconjugated (bs-20765R) at 1:400 overnight at 4°C, followed by operating according to SP Kit(Rabbit) (sp-0023) instructions and DAB staining.
